

One Planet, One Nation, One Race

14th of August, 2016

White House, Washington, DC

**PLASMA ENERGY
IN EXCHANGE
FOR WORLD PEACE!**

www.KesheFoundation.org

We are delivering the first plasma energy unit to the President of the United States. It is so simple that even the President can make a plasma generator in the Oval Office, for free!

You can follow on Livestream and Youtube!

Livestream at:

<http://livestream.com/KFSSI/events/5758705>

Knowledge Seekers Workshops Zoom Meetings are held at:

129th knowledge seekers workshop special presentation regarding Douglas to Washington DC to present the new Magrav unit

https://www.youtube.com/watch?v=Zbnc_BJx1kY

One Nation, One Planet, One Race, 14th of August 2016, White House, Washington DC PLASMA ENERGY IN EXCHANGE FOR WORLD PEACE!

Even the President can make a plasma generator in the Oval Office.

Keshe (K): good morning, good day wherever you are. We have shared the knowledge long enough and deep enough and now we are taking steps to share the knowledge. You have to understand why we made such a move. In the background for the past few weeks we are negotiating with different governments in the delivery of the generators and in so many ways the delivery of the technology. We saw some technical delivery and delay through the Chinese Keshe Foundation (KF) which was made by the people who were put in charge to serve the foundation and they used it to

collaborate with the people inside the Beijing government to delay the delivery in any shape or form that they could be happy with.

K: we started negotiation directly with people in the American structure and the complication got to a point that the White House wanted people like Yale University and MIT to look and then do delay tactics. This gave us the position has we have done before. We give the government the first chance and we give the US Patents two years ahead of the government. They did nothing with it and so we opened the key and all of us step by step delivered the technology in different ways. We did the Magrav units and the rest as One Nation. To us these kinds of delay tactics and techniques used in the final position we have done exactly what we have done before. You can see the steps we have taken now are part that you have of our work; we give the governments a chance. We give the governments a very good chance and we have seen the same technique and techniques to delay. They have units and they disclaim that. They say they need more and they give securities instructions to deliver more and more to attack each other and the rest of it.

K: in this day the way we started the procedure is that we don't rely on the governments any more. For us to go to Washington is putting face to face the public and the government in making a decision without talking. We have a unit, we have the structure, and we have the physical materials to get ourselves free of your control. In the next few days and the coming weeks this will be repeated across the planet. We will build, we will teach certain specific groups that we trust to build these plasma energy units very rapidly and deliver them to the offices the same as Douglas does in London, Paris, Tokyo, Beijing, and one by one we deliver to the governments.

K: meanwhile it is for us to be correct and we are not confronting national governments; we are establishing One Nation structure. We have given enough opportunities for those who govern or like to call themselves 'government' according to the ethos. Now we change the plan and the structure and we as One Race, One Planet deliver the totality to the human beings. This presentation in Washington DC is the beginning of the establishment of what I call One Council. It is we who are dictating to what you call governments to follow. We do not from this point on allow them to dictate what they want to see as we deliver what we have to and let the people dictate their districts or what you call countries.

K: this is the first move for us to stand as One Nation and One Race to tell that the new structure has come in and everything is free. We are not there to deliver a unit to the President of the United States. We are there to explain as a government as One Nation that we are here to serve humanity and to be able to deliver. It is a very, very big difference. We know that President Obama will not be in his office until the 21st as he is on his summer vacation. We know it is the same with the Vice President. We are declaring a point that we as One Nation are dictating our own terms, our own stands, our own technology, our own currency of balanced exchange and everything of our own which makes us independent of what the (existing) structure has done.

K: this is what the purpose of this is; it is not that we are going to see a president. We are going to say to the President: *your term is over*, not in 2 months time in November but in terms of those who call themselves world leaders to abuse is over. We are standing on the point that we are the new role, the new structure and we were correct, we shared and gave correctly and in return we expect the same. I carry this through on one understanding that we are here to make the change and this is the change. Energy was the biggest problem. For health, if we get sick, we look at the health aspects of the technology. For travel, if we like to travel and we are interested in space, then space becomes something interesting for us.

K: But energy and food is sacrosanct to all of us and it is the cornerstone to our lives especially in the modern life. So, I picked up on the energy; this is not something new. Last year we gave the Magrav units to do something with. *Energy in Exchange for Peace Conference* was one year ago and they have done nothing except blocking and everything else. Twelve months down the line we take over and this is the structure of the new government, the new way to work as One Nation, One Planet and One Race. And in that way you don't go and make the declaration to the smallest; you stand in front of the strongest and declare the position. The White House is the center point of the fields of strength, financial, and diplomatic are the world.

K: so you have to understand that we are taking a very big step and not only bringing the new unit and the new way of thinking. We deliver, not the White House. We deliver one energy unit; we deliver the gold, we and deliver the new financial structure in which no one needs to work to survive. No one needs a passport to travel and no one needs what to eat with genetically modified food to control them. I said this to someone and he

answered *you have to explain it*. With this technology what we have given to the man is the freedom of the birds. Birds do not show passports when they cross borders, they are not told what to eat and their energy for life comes from the sun as they travel. With this technology we made a free bird out of the man. There is no need for passports—dogs, cats and cows don't need passports when they cross borders. Why should a man need a passport?

K: we are one nation and you don't carry passports in one nation because you don't go outside of the nation. In space there are no borders and no one will ask you if you can show your passport. In so many ways this moment is the first structure of the standing of One Nation and this is what is important—not going to Washington, taking the unit to the White House, but standing as the new One Nation structure. We share and we take charge of the humanity, not just One Nation such as America or whatever it is called. This is the standard of leadership and you can only lead when you can deliver and protect. We lead because we can deliver and we can protect.

K: in the coming weeks to change the structure of a million years of borders will not be easy. Opposition will be rife and attack upon us will be very heavy. And, one of the reasons I chose such a short notice and especially running into the weekend is because I chose this day months ago. It's summer holiday and all those in positions are on 'free run.' All the money they stole during the year they now spend in the most expensive hotels and whatever around the world. There is no central government intact working in the world in any of the leading organizations. What they call 'national governments' are in the 'escape, summer mode.' It is the best time to attack and release when your partners are strong and active and those who want to keep the (present) structure are 'asleep.'

K: certainly I chose the date very rapidly to be by Saturday and Sunday (for Douglas to go to Washington DC) because it does not give them time to gather opposition. Everything we do in the next 3 days is pre-calculated. To be able to run as One Nation you need to be aware of all aspects and this is my job. This is why I hand this over to six knowledgeable people in the world of science that the science will dictate the condition of the structure of One Nation community and not through politics because then they don't have to look for financing, wars or anything else. Their objective will be how to make life easier for the human race.

K: And, this is what we do. Energy, food and material in the next few weeks will be continuously released around the world. Those who are close to the foundation know. As I have said we are working on a pocket sized energy pack unit of 2 to 3 Kw. Once we can complete that even the unit that we are offering on the table on Sunday to the public will be obsolete. But it is the way that development and technology works. Try to get as many people as possible to Washington and use all media as much as possible so that all see for the first time the unit that frees them from the shackles of what I call the energy. Being free from energy (needs) you become freed from being tied up in cities? One of the reasons we are tied up to pay such heavy rates on rents and to be controlled is accessibility to water, food and electricity.

K: If you go back to my talks years ago I wrote an article that said *skyscrapers in Tokyo, Washington, London and New York will be empty as people will not pay these exorbitant prices to live and to have access to water, electricity and few. As we make these essentials of life free then you will not have to be a slave to work and to be told that two weeks a year you are allowed to spend time for yourself and the rest of time you are a slave to us.* In the future this move we are doing now will become apparent that this was the pinnacle point of change of history....the freedom of man from every aspect. In the coming days I will teach more and more how to generate water and how to create water conditions so that you do not need to worry about whether pure water is contaminated or not, whether it has fluoride or something else in it; you don't need to worry about the food if it has anything else in it.

K: we have worked as a team long enough and now it is time to deliver. And, we don't go and meet in the back of cafes to show anybody the technology. We are going to the White House to the most powerful point on this planet at this time in history of man that everyone is looking up to. We deliver and if Obama is there to accept it, it means that he cares for his nation. He is informed that we are on the move and everyone knows. On the other hand if anything happens on the way in the next few days we will release the technology in such a rapid way that it paralyzes the whole Western economy. Don't make a threat—I never make a threat. I am making a statement and the statement comes out of the strength of the knowledge.

K: on the 14th of August this is the turning point for humanity where at one time the One Nation, One Planet, and One Race will virtually show its

power and energy in abundance. If you get your circuits sorted out 100Kw is no dream; you don't have to worry about electricity bills, turn off the lights, and shiver at night because you cannot pay for the electricity. Water cannot be taxed because you convert the moisture. Government asks you to pay them and you say, *no problem, I only carry gold; how much would you like? I work for myself and I take gold out of the energy of the space of the universe and not from a mine. I don't need a license.*

K: understand one thing fully—we are not rebelling we are delivering and with the deliverance of peace there is new knowledge, new ways and we will see a lot of attacks on us in the coming days. When they wake up and see what is happening in the next 2 or 3 months I see that oil will be \$8 to \$10 a barrel. In the next few months you will see a lot of empty fuel stations. And people will not need them. In the coming months one by one nuclear power generators will be slowing down and shutting down. We see most of the gas power and fuel power stations will shut down one after another as there is no need for them.

K: You have seen this before; if you lived in London 20 years ago when they nationalized the telephone (British Telecom) they had a field day and on every corner of every city they put 1 to 4 telephones for people to use. They used to be used with coins or cards. Then the cellular phone came and all these telephones became useless standing nowhere. Nobody was paying to have their line connected. This is new technology and we are delivering the technology and we change the world. There is no need for power stations or nuclear stations. I see countries like France and Germany will totally oppose the work we are doing. France is 85% energy consumption from nuclear. These power stations cost a lot of money to run and they cost a lot to dismantle. It's a huge burden they have placed on the nation. We have seen this done in England where there are 2 or 3 power stations. Germany is the same. The US nuclear power stations will shut down one after another.

K: You have to realize one thing that if one million people take off 3 to 5 Kw off the grid and you will see very quickly that the generators become useless. This is where the African nations will win. They did not invest in these power generators and now they have the freedom on an equal basis while the West is paying for the burden of the loans while Africa grows. This technology is to bring balance from the ones who have stolen and now ones who have stolen are paying back for what they robbed and now the

others are catching up very quickly. Please join us online and in Washington and we are trying to get Caroline to be in Washington, one of us will be present in Washington if we can get her through.

K: in so many ways we started the change and now we are waiting for the change to catch up. We are still working in the background in the innovation center to make this more compact and much easier that when we release the blueprint you won't need to adjust it any more. we are trying to summarize as much as possible so that at the time it is released people can go and collect their Magrav systems and add a few pieces and see it in operation.

K: A lot of people ask how they can pay for the fuel or how can we support for people to go to Washington. I have paid through the foundation for Douglas. The KF is supporting his work; if you want to make a donation just go to the KF bank donation information. This is the channel we always use. Those of you who want to be there, we will explain the road map in a few minutes. Those of you who want to be able to support and inform the newspapers across the world, all the details will be there. We have made a banner/brochure for this on the internet and it will be released. Our security team is working in the background to make accessibility to Washington if it can be done. The whole structure is not we as KF but we as One Nation that from today set up the course for humanity, not because we talk but because we have the technology to do this and by doing it we deliver our position and condition where we are.

K: you see the picture for the banner on this call. The team will explain it for us.

R: is it okay to show the PDF of Douglas' path to the White House and the times he will stop?

K: yes, it will be done step by step. Let them take over so they can see the roads and Douglas can explain the rest.

Douglas (D):

Douglas's Path to White House

1. Gateway Arch, St. Louis

Address: 100 Washington Ave. St Louis, Mo 63102, US

Saturday depart at 2:00 AM (CDT) from Missouri

Drive 7 hours to Arch—Arrives at 9 AM (CDT)

Wait 1 hour at the front of the Arch till 10 AM (CDT)

Where to meet: in front of the arch.

2. *Depart to Indiana at 10 am (CDT)*

4 hour's drive to Indiana

Arrive at Indiana at 3 pm (CDT)

Depart Indiana based on own preference to match the next destination.

Address: Post Plaza Shopping Center, 2225 No. Post Rd., Indianapolis, Indian 46219.

3. *Columbus, Ohio on the way—rest stop –will announce on the day if a meeting place is decided.*

4. *Washington mall (6 hours drive)*

Arrive at Washington Mall after 10 pm (EDT) and sleep till next Morning on Sunday.

6 am (EDT) Meet at Eat 'n Park Restaurant Sunday morning

Address 320 Oak Spring Rd. Washington PA 15301 US

8 am (ED T) depart to Washington DC on Sunday

5. *The George Washington University (5 hours' drive)*

Arrives at 2 pm (EDT) in Washington University (University Yard) to gather for half an hour and then go to Lafayette square to meet at 2:30 pm

Address: 2121 1 St. NW, Washington DC 20052, US

Where to gather: University Yard.

6. *Lafayette Square*

2:30 pm Meet at Lafayette Square

Address: 1500 Pennsylvania Ave. NW, Washington, DC 20500, US

D: this is what we have compiled and I live further west of St. Louis and this is the closest major city. I will depart in my location in the southwest area and drive about 7 hours to the arch in St. Louis. We will arrive and meet whoever wants to join in from this central location. We will gather and meet for awhile and head out to the next location. We will drive to Indiana and arrive there about 3 pm and then depart to the next destination. There is a Home Depot and a shopping plaza with a parking lot for a meeting place. We will post live on Zoom and Rick and others can inform you. This is a rough draft and we will stop in Columbus. We will go on to Washington, PA and arrive at Washington Mall and stay overnight in PA. At 6 am we will meet for breakfast. We will depart for Washington DC on Sunday. We will locate and hopefully meet up at George Washington University and then

proceed to Lafayette Square to meet. Most of us call this the Commons at universities in the US. The White House is at 1500 Pennsylvania Ave.

D: We will congregate with peaceful intention to deliver plasma energy for world peace. I will peacefully walk up and politely asked to be introduced and what my intentions are and why I am there. Hopefully with the grace of God and a lot of ambition the doors will open and we will be greeted with love and kindness. We are still working on this plan and it's a lot to put together in a couple of days. The main intention is to show that man is willing to travel across the country for just one man and others along with him to beg peace and stop the insanity. Let's use our minds for good purposes and not ill-gotten gains. There are ways of doing things that are so much more important than we are doing now. This energy is for the whole world and this opens the door for the energy to stop the fighting. Hopefully we will have a lot of support and positive energy. And there will be the nervous energy, no doubt about it. There will be exciting energy along the way with positive vibrations and intentions. If we reach one person there, just one person, and if I can touch one soul I can consider this 'mission accomplished.'

D: the President may or may not acknowledge us. Those around us that see the devices will be curious with what we are doing and will want to know how to do them. If the President doesn't want to see me there will be a lot of questions pointed to the President as to why he didn't want to see such a device. It's a win – win for the KF and humanity all together. Look at the people at the square that come in and out every day. Just be our being there we are representing One Nation, One Race and One Planet and peace. Our sole intention is to release humanity from the bondage of enslavement and I can't think of a better place to do this.

K: thank you Douglas. Can we add anything else? We have a team of people to co-ordinate and see this through so if you need anything just go to the link we have set up. The team will respond one way or another and we will use KF phone for communications and we will use ZOOM KF throughout the time that Douglas travels until he arrives at the destination. We did this before when we did the live tests 2 or 3 years ago and we would leave the camera on. This is another test for humanity. So, we try to have the team in the background to explain how, where and if you have a problem you can contact them.

V: there will be a link on the main website with the locations and any updates to the location and we will post that there. Please inform everybody on social media and facebook so that more will come. Thank you.

Flint: posts map at 44.52; this is a generic map with the 4 stops described.

K: could you explain to us where they can go for the link? Is everything already set up on the website? When will it be up so people can adjust their time if they want to join?

K: I got some texts and people are asking—this is not all American. You have 2 or 3 days that you can get yourself to Washington because this is humanity speaking, not America. If you see a chance, we know some are coming from California. Fly to Washington and be part of the KF family. www.keshefoundation.org is the website. This is the time. Those of you who cried for change, change is now on the table. We have done our work and now it is you who must deliver it. The backbone of the work was the technology. The front end is for humanity to use it and it is for you to deliver it. We have sacrificed a lot and the team at the KF has worked hard and relentlessly for the past 3 years to bring us to this point.

K: those of you cried “wolf” now you have to act and you cannot blame any government because as part of One Nation it is you who is responsible for One Nation. You can’t say *they won’t let me do it* because it is you who is part of the One Nation and you have got to do it. Read the bottom of the banner: *even the president can make a plasma generator in the Oval Office*. I wonder if the President would like to get his hands dirty. We are, and send these directly to Washington to the President as many as you like...don’t wait for someone to do it. Ask everyone on the internet to send the flyer to the Oval Office in the White House. On Sunday we expect the President to be there to accept it even though we know he will not be there.

K: we don’t leave the unit for Office of the President to look at it. He has to accept it, see how it works and explain to his people that he has the tool in his hands to free his nation from the crisis of energy and now we are independent. So, I wonder how many people will come to what they said and are able to deliver. US Keshe Foundation will support and we will put people there to man it. Please understand that we are here to start a new evolution for man and not to start a revolution and problems. Evolution cannot be fought, but revolution can. This is the evolution in the science of man and with it will bring the revolution in the structure of the society of

man. We will meet again tomorrow at 10am to update; we will be there when Douglas starts his trip and we will be there along the way. We will be there when he arrives in Washington. Don't forget the aim is not to deliver a unit to the White House. It is there to make the mark that we are One Nation; we are the new rulers to rule for ourselves, independent of the shackles.

K: you have to understand one thing: if we start a revolution they have to fight us; if we start evolution they become part of us and this is the point. We meet again tomorrow 8 to 8:30 am CEST. That would be Saturday 2am CDT. We will start tomorrow to greet you farewell and we start with 2—a husband and a wife. And maybe it's the beginning of the Adam and Eve. We will see if we can change the course of humanity.

K: there is something very important for a lot of you to know. In this structure of developing and testing in all sorts of things, Douglas' wife has been there as a shadow like Caroline is with me. So we will see the same procedure that they both arrive in Washington DC and I thank you both for such a huge sacrifice. Time will tell what we have achieved and how this trip has changed the course of humanity. We come back at 8:00 am CEST and we start the process and 'follow' you step by step. Does anyone want to add anything else?

V: can you explain about the promotional materials we are going to put up with the flyers and the banners that people can print.

K: it has to be a small, fast print because you don't have that much time to do the layout. Make use of the banner you just showed to send across the world straight away. The banner with Douglas and the meeting point, this is the banner—it's very easy. We can add the map and route on the bottom of it. Somebody from Iran wrote while we were talking about the 'march.' We are not marching, we are delivering. This is the change and I hope we can all gather to understand this. Put this on your cars. Hand these out. Use this on the internet.

K: I think you need to add that we are delivering the first plasma energy unit to the President of the United States on that day and time; people have to understand the purpose for our being there.

R: you could even say *delivering plasma energy for world peace to the White House (or to the President of the United States.)*.

K: we go and add why we are going to Washington. Thank you; we meet at 8 o'clock tomorrow. We have to bring the change and it is we who are responsible for it, not the next door neighbor or somebody else. There is a famous saying in the White House: *the buck stops here*. And the buck of humanity and change for peace stops at the White House as was said by Nixon. Thank you for today. We wish all the best; if you need anything contact us on the website as we have around the clock monitoring on it.

R: the end of the 129th Knowledge Seekers Workshop.
