

154th Knowledge Seekers Workshop January 12,2017

<https://www.youtube.com/watch?v=IIDvO9LfCqY>

10:13 Minutes

Mr. Keshe (K): good morning, good day to you as usual wherever and whenever you listen to this teaching. This is a local situation and we sometimes have hiccups in transmissions as we have participants in teachings from Unites States, Canada, Slovenia and Africa and other locations. People sit in support in the background. The Keshe foundation (KF) is the collective work of a number of people around the world. As you see this is the 154th KSW in our 3rd year of teaching.

K: there are a number of things to go into for more understanding. I have some requests for information in respect to Ghana and our work here. The Ghana Atomic Commission collaboration with KF Ghana has taken a new direction and dimension. We have been given and accepted the premises of the University (in Ghana) which means that KF from today or this week has a permanent residence in Africa. It is one of the most prestigious buildings in the University Campus and part of the Ghana Atomic Teaching section. This gives us a permanent research facility in a massive building built by the Russians and it is on the main row of Atomic Offices.

K: This is a secure premise and it allows us to establish a permanent section. We have recruited scientists that we would like to see collaborating in the center and already the KF Manufacturing working team is in place with masters and PhD students who have completed degrees and have gone into working and research, teaching and development. This has given us a whole teaching and working a new meaning. What this means is we would like to follow up around the world with those who set up teaching and what we call manufacturing. What it does on the practical side is whenever the scientists decide the production in a certain section is completed by them, then they switch to the research or they bring their part of work to research and manufacturing.

K: this means that the people on the floor who are producing continuously add to the knowledge and this changes a lot of things for us in Ghana research and manufacturing. We will release pictures and accommodations of the research facility in the coming days. It is one of the things we needed within the structure of the university where the teaching can be done freely.

The teaching has been extended and hopefully next week 2 sessions of 15 minutes to half an hour will be given to the KF on the national TV and radio (in Ghana) on what we are doing and what we are manufacturing.

K: So, have brought the public teaching, manufacturing and collaboration with the scientists all together. It has become a wonderful collaboration that has taken a lot of time and investment. Now we see the fruit of the work and this should be a pattern for a number of people around the world if you are looking for how to set up your manufacturing and teaching. We have the advantage of having access to lecture rooms where we can give lectures frequently on the daily or weekly basis to different sections of the public. Within the structure of the Atomic Commission this allows us to selectively teach doctors, veterinarians, scientists where they can go from the lecture to the laboratory and test the results so they have direct understanding. We extend this to all the African nations so Kenya, Nigeria and other African groups can have access to the laboratories. This will be completed in 2 to 3 months.

K: the next step for us is that if you need anything to be tested or validated you can send it to KF Ghana and we will test it for you, whatever it is from plasma reactors to new materials and the rest. We hope to establish another section soon in the Philippines once we complete here. We have received a lot of communication in the past few weeks of what the outlook is in respect to the earthquakes which you have forecast. We expect massive EQs in 8 Magnitude (M), 9M and possibly 10M in and around Japan in the next few days as well as the West Coast of the United States.

K: We have asked directly and urgently that our staff in Tokyo leave. The KF staff at Tokyo University are leaving to sections in which they feel happy and safe. If there is the EQ which has already set up and manifested itself by coming to solid land in Japan, then we see a situation not far from what we saw in Fukushima. This is an alert and we cannot confirm the position and place. But there will be anything from 6.5M to 9M on the coast of Japan and we take this very seriously from what we understand that we have asked our staff to leave their positions (in Tokyo) which is very unusual.

K: We have made a warning again to the people in the West Coast of the United States in California. We see EQs from 7.9M up to possibly 10M in the coming time. The reason for this is the sequence of the EQs which we

have seen. If coincidentally they merge together at the same time it is between two waves coming from different parts of the world hitting at the same time and same place, then we will see 9.5 to 10.2M. The same goes for Italy and we have issued warnings to the people of Tehran. We see that an EQ in Iran is imminent and we have advised people to say goodbye to Tehran in the past 24 hours. This is due to a number of EQs that have taken place in the last 7 days and you have to understand that we see large EQ situations this time of the year every year, year in and year out.

K: But this time there are two EQs. One happened last year in Chile. It is the loosening of the 'pin' and now the continents have loosened in a very big way. We see the EQ that is deeper than 150 kilometers and bigger than 7.3 in the past 48 hours in the Philippines. This itself has a consequential, sequential interaction and if the EQs this deep reach 10 kilometers depth, then we will see EQs in northern Africa and in and around France and Spain.

K: We will see volcanic eruptions in Italy and EQs in Greece and strangely enough on January 3rd for the first time in a long time we have seen a 3.2 EQ around the UK. This has put pressure movement. It depends if the waves arrive together in one point that they are amplifying their forces, or if they arrive sequentially one after another. We see this for certain in the West Coast of the United States in the next 7 to 10 days.

K: It is possible if we pass the 21st of February without a major EQ then the next phase will go in to the latter part of this year. But, with what we see and we hope we are wrong, we have informed the Italian KF to start protecting themselves in the next 72 hours to the next 7 days. Everything will move in the next 14 to 21 days. And we hope you will come out of it safely. But what we have seen in the EQs in the past days near the Philippines we see this immediate effect on Tokyo. For this reason we have asked our staff to leave Tokyo as a matter of urgency and they are leaving today.

K: we see the same in the West Coast of the United States. We cannot pinpoint the magnitude or the location and it all depends if the EQ in the Philippines arrives in 3 directions together and then how much force is diverted to the west coast of the European continent. The pressure will be absorbed fully by Italy and we expect large EQs around Rome and north of Rome and around Napoli. This is our forecast and we said we are expecting it and now we have seen it. A lot of things depends if these sequential

movements do not release other layers that these can create further problems. If you are KF business in Japan please take protection. We advise you strongly to leave Tokyo and around the coast of Japan. We issue an alert for the West Coast of US around California. We expect a large EQ in the southern United States around what you call the American continent. This can lead to massive, massive EQs. We still see if the EQ hits before January 20th President Obama will stay in power and the new administration will not have the power to take over due to the EQ situation. We hope we are wrong.

K: Going back on other teachings a number of you have asked in respect of what we are trying to teach in a deeper sense in respect to the state of the soul. The operation of the soul and the physicality—how do we get to understand more and more? How do we see to understand our own internal structure? As I explained in the teachings at other times, in the world of science and in physical science we have understood partially and not fully, the operation of the fingers, the arms, the lungs, and the heart. Man has never come to understand the operation of his own soul which in fact has the same components and has components that affect the physicality.

K: Part of our teaching and the direction we are going gradually is to understand the operation of the soul of the man. This is the change in course of the knowledge of the teaching. As I said we started with matter and taught you the nano, the gans, the field of the gans and the correct operation of the fields which leads to the central focal point of what we call principal matter energy.

K: Now man has to mature and to understand the operation of his own soul and to understand that *if I do something in physicality what are the sequence and consequences in the direction of my soul? I ask, where do I go, how do I think through my soul and how do I operate? Is the soul of the man the Creator of the Man? And how much have we been kept in obscurity in the operation of our own souls?* If you understand the operation of the soul, does the state of physicality matter?

K: *I made man in the image of myself. Does the soul or is the soul the image of the physicality or is the behavior of the soul the image of the physicality?* Man needs to mature. We were happy to work with the puppet of the physicality. Now would we like to operation of the master who handles the string of the puppet? The understanding, operation and

behavior of our souls then become the manifestation of the behavior of our physicality. Then the man becomes a perfect man if he understands the totality of the operation.

K: this is the reason why even in the communication with our team in Japan, they said goodbye. *I said to them to rely on your souls and you will find the paths if you stay as you have to be.* We need to understand the operation and the existence and mystery of something we called the soul. Now we have to understand the operation of the soul; it is the friend which has been with us and has been the creator of us. We need to understand how much our physicality is operation, behavior, position, color of the skin, shape of the eye is controlled by the manifestation and behavior of the soul. Our souls are endless operations that are responsible for controlling the physicality as our souls have other dimensions of interaction.

K: it is very much like a meteorite coming into a magnetic gravitational field and we see it burning in the sky. The physical manifestation of the man is the burning of the light and the interaction of the matter state with the fields of the soul of the man which gives the physicality of the man. Do we need or are we part of the same structure which we interact and live with our souls which then, because we think we control the physicality, that the soul is something beyond our comprehension. The faster and sooner I can teach man to understand the operation of his soul, and how the souls of the others interact and live with our souls (the better). Then because we think we control the physicality the soul is beyond our comprehension.

K: the faster and the sooner I can teach man to understand the operation of his soul and how his soul has control over his physicality, then the man can go into space. Then it is your decision in what form you want to take into space in the spaceship through the strength of your soul. The soul of the man will take man to every dimension of this universe and beyond. The physicality of the spaceship has the limitation of the dimension and the position. Those who mature will travel the depth of the universe. Those who have the fear of maturity will go in ships out of the uncertainty of understanding the operation of their own souls.

K: so in the coming time we will divide into 2 or 3 different sections...those who understand fully the operation of their souls which is the freedom of existence across the universe, and those who will take into the ships in which collectively they trust others to protect their physicalities so they can

take their souls across. And then there are those who will stay on earth where physicality is the ultimate goal of their existence. Let us understand our souls and how we can communicate and interact and shorten the transition point between the soul and physicality. This is all that you can learn. It's very much like you are behind a mountain or a hill and you hear somebody shouting. You don't know who it is until you go over the top and see the other side and find the maker of the noise. The closer you get, the closer and shorter the transition time and position.

K: now, the body of the man is on one side of the hill and hears the noise of the soul all the time but has never seen it. It is time to climb the hill and the mountain and look down and see the creator of the man which is the soul of the man. How do we want to achieve this? It is the extension and understanding and the fear of the man about the truth of himself. Some people feel happy to hear the noise from the other side of the hill; it doesn't matter what it says. I can hear and do what it wants or I can tell 'him' what I want to do. Some people will go over the hill or the mountain and join the other side. When you join the other side to see the maker of the noise, you don't need to shout. You interact and you sit next to each other hand in hand working with each other. And this is where we are trying to take the soul of the man with the physicality of the man and the operation of the two.

K: the point comes that *how do I move hand or how do I run from one place to another? What does that have to do with my soul? The soul delivers the information and it is for the substation to take action plus what the substation sees in respect to its environment. The substation is the physicality of the man. we have go so much entangled and involved in operation of our work that we have forgotten the reality in acceptance of the truth about the line of communication. We have accepted messengers that we call prophets. But are the prophets, those who have been on top of the hill to hear the noise of their own souls and to understand and at least come into interaction with their own souls that what the soul has given has become the 'messenger.'*

K; the problem is to understand that every man is a messenger. It depends on what message he wants to hear. Those who decide to work with the structure of the physicality confirm the existence of non-existence of the soul. It is there and because we are more tied up with physicality we are where we want to be. There are different ways that I started teaching last

week or the week before in the movement of the finger in feeling the pain on the finger. Try to find the position in the brain.

K: now let us go a step further. You touch the finger or you decided that you are going to have a pain on the tip of your index finger; you carried the message through the body of the man to the position on the brain where the place is for feeling that particular feeling on the finger. Now take that and move it. You will pass the emotional layer and you will pass somewhere between the principle or the soul and the emotion. Try to follow the fields and it will not be in the physical direction or dimension but in the field that you will see the light and you will see the interaction of the conversion into the center of the brain of the man where the soul sits. And, you knock on the door of the soul and then you have to understand the strength and construction of your soul.

K: the construction of the soul of the man is nothing but the same as the center of the construction of this planet or any star. It has layers, lumps, and bumps where the fields are interacting. It has positions that are deliberately placed by fields to absorb more fields that in the conversion can be interacting with the physical part of the body of the man so that then it can show its response. You find where the souls fall in love and where the heart of the soul, the center of the operation. You will find attachment and detachment of the soul with the physicality and to what level and what energy that each one relates to the other so that it connects or disconnects. There is no difference between the operation of the soul of the man and the physicality of the man in operation. But, man only sees one third of the operation. The other two thirds of the brain which is the operation and the connection to the soul have been ignored.

K: in the new research and development it is not to find out which part of the brain connects to which part of the physicality and the emotion, but to find out which part of the brain connects to which part of the soul so that the information can be correctly delivered, accepted and in a way, executed on both ends—the side of the soul and the side of the physicality. Is man mature enough to look inwards and see his own soul and to understand the operation of his soul? this is my job; I actually after years of teaching have just started to complete the reality of the mission—to teach man about his own soul, the operation of his soul where he enters a new dimension in the universe and you ask the soul or put across to the soul that is how it looks

here and I want to have 14 arms and 20 legs. I am happy to be here and I don't put too much pressure on my emotion that puts pressure on the soul.

K: Now do we understand the new teaching and now we understand more or less after three years why we are here. Some of you who understand the operation of your soul will take into space in no time. Some of you who see this as not being understood will ridicule and that is okay. You think according to your own understanding. Some of you who understand the position and prefer to stay in the dimension of the physicality of the earth, this is the path you have chosen because the grass is not greener on the other side of the fence. Would life be easier in Planet Zeus? What do we see as the structure of the soul?

K: many of you have seen it and due to the lack of understanding and too much busyness in the matter state of the material world have ignored it because it wasn't there and you couldn't see what it does. Most of you have seen the operation of the soul if you have been around the KF the past two or three years. Many of you have seen the strength of your soul, the operation of the soul and preferred not to do anything about it. It was not something that you could understand about what it was. There is no difference between the operation of the cores where you have seen the vacuum in the middle and the transition which is the liquid and the matter state which is the boundary. We see the same with the structure of the planet--the soul, the liquid matter, and then the physical manifestation.

K: the soul of the planet transfers its energy and emotion through its magma and we see the earthquakes and eruptions and movement on the surface. The EQs and movements of the plates are like a man moving his arms and legs. Magma is part of the part of the physical transmission which is the brain of the man. But the emotion of the planet can be transferred. But the central core which we call the Caroline core is the soul of the planet. As we have said before, there is no difference across the realm of creation. So it shall be with the body of the man.

K: the soul center of the brain, the transition to the matter of the physicality which is through the brain and partially in the dimension of the physicality half or third of the brain has converted itself to the shape of the emotion of the physical part which is the body of the man. So, where is the difference? If you understand the operation of the core and if you understood the operation of earth then you understand the operation of the soul of the man

and the physicality of the man. It is the choice of time and language that has brought the problem. This is the same as Coulombs' barrier and the atmosphere, the eddy current of backflow and the gravitational field.

K: So in essence we come to understand one thing and that is that there is no uniqueness in the structure of the body of the man, in his physicality and his emotion and his soul. Go back to the books one, two or three, as you read and put the collective knowledge together to understand that all have always been the same. Change the creation of matter to the creation of man. Change the structure of light to the dimension of the emotion of the man where the energy transfers from the principal to matter state. Change the creation of the universe to the soul of the man. Now we have seen it.

K: There is no difference in the world of creation. It is just understanding the interaction and the reaction of the body of the man in respect to his soul and environment. We have never sent an astronaut or cosmonaut without clothing and protection into space to see if he survives. We assume he will die. We assume that he needs the protection of the condition of earth pressure for him to confirm his existence. But, man has never dared to take the next step. We assume that in deep space that man without clothes will die. But if the man if the man understands the operation of his soul and the interaction of the physical manifestation and the soul of the man, does the man need a space suit as I have said before? Or would the skin of the physicality of the body of the man by changing the characteristic of the skin make man survive in space in any location in any universe?

K: now you see the restriction has been on the man himself by himself. Those who claim to understand the knowledge of the creation that has brought this limitation for man to understand. How much more falsified knowledge do we have to accept. Is the ultimate speed of light the speed of motion? But now we understand the bookkeeper has made a mistake because he didn't understand the totality. Now we have to understand if we need the physicality of the man to go to space or do we need to understand the operation of our souls so that wherever we lay our heads is our home—it doesn't matter if it is planet Zeus, within the galaxy or within the home of what we call planet Earth.

K: try to stay open minded. The fear of the unknown has restricted man to the physicality of the body and all the conditions we have seen. Once we have submitted for one to be inferior the others have followed. The race is

to cover the religion and everything else. Try to connect your physicality with your emotion where you understand the emotion but you don't control the emotion. Then try to understand the operation of emotion and where it goes on its gravitational side that goes back to the soul of the man where the magnetical side is the part of the physical manifestation of the man. It is the emotion; it is the change of the change of strength.

K: why do you change moods? Why do you go suddenly from happiness to sadness? Why do you go from rejoicing to crying? Try not to look at the emotion but to look to understand where the fields of emotion will create reactions in physicality and the soul. Then you will find the path to the soul and once you find the path to the soul then you will have to understand the full operation and control of the soul of the man. With the biology now we have to do soul reality to understand the structure of our own souls. To understand how our souls operate, which part of the soul is connected to our physical dimension in the brain and the physicality? And in so many ways in that process we have to understand the magnetics (?), the positioning, the strengths and the colors of our own souls with all the compartments which it carries. What it gives out in interaction with other souls and what it gets back becomes the information for the soul.

K: I said very recently that the angel of death has visited the planet Earth. What does that mean? Does that mean the end or does it mean that with the death of limitation of the understanding of the physicality in respect to the connection to the soul then the angel of the soul will appear? How can you be an angel and be the end? In reality it is the ending of one and the beginning of the better of the other. It is the man who creates limitation and this limitation has to be taken away from the comprehension of totality for man to be able to travel the expanse of the universe created.

K: It is you with your soul that decides to be part of the spaceship and it is you in the strength of your soul that decides to manifest yourself on Planet Zeus. It is you in yourself that decides your soul needs the energy to create the emotion of happiness within the physicality so that it can dance and to show the emotion of the transfer, the laughter into the direction of the emotion of the soul. And then you have to find where in that soul the position is dictated. Everything that man has done is recorded within the structure of the soul of the man.

K: If man could find and understand the operation of his own soul he will see the history of the man is with his own soul as all the souls in all the times of operation are all collectively connected and stored the same. So go back to my teaching of years back. Would you like to see the crucifixion? Would you like to see the mother of God? Would you like to see the manifestation of the beginning of the Islam? Would you like to see Buddha? It is all registered in your soul. I said many times that I bring man the history of man for man to be ashamed of. You were waiting for a show and now you understand the show is within your soul.

K: this is the secret and the faster the man understands his own soul the faster we can go to the next step for his own freedom of his limitation of understanding of the totality. It won't be very easy. It is a heavy task. But, the problem is that he cannot show others how to do this because it works according to the strength and the dimension of your own physicality and soul. You can guide, but you cannot say *you go from this to this and you mix so much of this with that and you get to your soul*. As I have said many times, you want to find the path to your soul read the hidden books. The hidden words of Baha'u'llah is the guide to find the path to the soul. But do not look at the riddles because he was the best riddle writer. Look at the essence of the knowledge and you will find the mouth.

K: Mohammed, bless his name has done the same. You will find the same in the writing of Christianity that have not been tampered. Many of the books of Christianity have been re-written to fit a few over the centuries. In the Torah we see the same thing. The path to the soul has been mistaken as the work of the physicality. *Thy shall not steal*. You have stolen from yourselves the carriage of information from the soul to the physicality so you pay the punishment of the existence of this planet. In taking from the source you have diverted from the direction of the physicality. Try to understand a deeper essence and then you understand the totality. Is life just eating, meeting, sleeping and more? Or is it a path to change the direction of the strength of the soul so that the soul takes a new position?

K: this goes back to the teaching we have done many times. Why when we pray for the souls of the people who pass or for our children does it bless the soul that is doing this? When you do this you give from your soul directly to soul of the receiver and then you elevate that soul. Then in elevating according to the law of the plasma in trying to elevate others to the same

strength as we use for the medical applications, it elevates the soul of the totality.

K: This is where the praying goes....we bank with our own souls and nowhere else. But the banking has been hidden behind the buildings of the churches, mosques and temples. Because man has not seen the creator of the words on the side, the intermediaries can say whatever they like and 'pray' in the Chinese whisper. This is why I say that there are no temples and churches in the universe because the man who takes himself to the space of the universe has already understood that there is no church and no temple.

K: try to understand the connection to start with between your emotion and your physicality. Try to understand the connection between the emotion and the soul and then you become enlightened so you come to understand the operation of the soul. (57.16 minutes). And then you will become part of the universal community because in reality we are all plasmas that are interconnected and keep the condition of position in respect to each other so we have to become part of the universal community. Becoming part of the universal community is not to get on the spaceship and go into space and see a bunch of aliens and say hello and shake hands because they don't speak your language.

K: the true universal community connection is in understanding the truth.
Rick, are you still there?

Vince: Rick has dropped out and I am getting a video ready.

K: it is for us to understand ourselves. It is for us to be able to understand the operation of our own souls through understanding the connection between the physicality, the emotion and the soul of the man. I have taught you in past years a tool which many times I have referred to. Not many people had the encouragement and audacity to take the step to test it. Many of you build these transparent balls, cores and many of you rotated them and saw the emptiness in them. In that process you were happy to see the ball in the middle, the liquid and some ganses on the edge.

K: Now try to play two games. Make the ganses in as many layers as you can. Then try to carry your emotion to the ball. Feel happy and observe the changes in the liquid, the size of the gap and the thickness of the ganses. Don't forget your emotion is connected to the fields. Try to feel very happy and see which layer changes and if the thickness of the dimension of the center changes. And you have made yourself an indicator of the connection

of your emotion. Then try to understand how you can connect with the empty space in the center of what we call the soul of the man. (1.01.08 minutes) Then you shall see the operation of your soul in the ball. It is so easy.

K: You are looking for the fields of lift. I was looking for the structure of you also. That time you could not understand. Maybe now you can. Then try to transfer your physical pain and emotion through the gans layers through the transition and see what happens to the empty space in between. If you observe closely you can even see the sparks and lights in different parts of the empty space. Then you understand that this is the position of my happiness within the soul. You are looking for lift and I was looking for elevation of the soul of the man. You were looking to see how physically you can move it and so many times I said that your soul controls the system. You look at it; you give it sincerity which means you have touched the soul and you will fly.

K: Maybe it is time to understand more and to look at all the tools you have made. The majority of them have been for the connection between your physicality and the soul and you never understood. Many times I said that the controller of the flight system is the soul of the man because the ride of communication with wires and electronics is too slow. Electronics is like the neuro system and it takes time for the information to go; it is too slow. But the fields interact directly at the speed of their strength. Now you understand how easily the game you have been taken for full understanding.

K: All of you have been sitting and watching the reality of the two and didn't distinguish it. Maybe it is important for all of us to start making the transparent balls with different ganses. Don't forget zinc is the line of your emotion, copper is the line of your physicality, amino acid is the connection with the planet; the rest of your physical material condition within the sphere of the ball will give you a rough indication of how you are going to play the emotion, the physicality and the soul. See the effect on the other two. You already had the tools to measure the soul but you never stood still to see what was in your soul when the ball was moving and the liquid was there. How does your emotion change the size or position of materials in interaction with each other?

K: I made this very clear but I referred to it a few time. Go back in the books where we show the separation of the gans in one of the tubes. You

have a clear line, but you have an intermittent line; gans stay separate according to the sphere (? 1.05.32 minutes). So does the body of the man stay separate in respect to the emotion and the soul.

K: the process of wisdom comes from independence of the physicality. If you want to enter the world or the universal community as we call it, is our future in our hands or is our future dictated by the others who position their souls in a specific position that our souls have to respond to? You have seen the magnets how when one is stronger and moves, the others have to accommodate. How much does our soul accommodate the others and how much does our soul enforces its strength on the others for the others to accommodate themselves in respect to us? Do we see leaders or do the people live that their soul dictates how the others operate off it? Many times we have said *is the soul of the man the controller of the man? Or does the physicality dictate the operation of the soul that it in turn accepts the motion and the physical movement?*

K: How far do we need to go to see things? How far do we know that we can change things? How far do we understand the operation of our own souls but we have decided to ignore it because in the realm of physicality we have a problem with connecting and understanding it? Does the soul of the man rotate at that speed which forces the operation of the brain to be kept at a given condition and position? Can we change the part of the emotion and place it in another place in the brain in the cavity of the skull and then with it move all the things which are connected to the physicality in that part? Let's say if you lose half of your brain to cancer, a tumor or whatever, then what happens with the line of communication between the soul and the physicality? What happens to the emotion that part was controlling? Do we lose it? The answer is No. You can replace any part of physicality in respect to the brain and emotion in the brain with another part of the brain or even within the neuro system.

K: I have explained this in the medical teachings. We have videos of it to show. We have videos of people who have more or less all the brain except for the soul part has been taken due to tumors and the head is flat. One person was paralyzed in bed for 5 years. In understanding we can reposition everything and then you can get a paralyzed person walking. What happens if you have lost the part of the brain that is responsible for your physical motion and your emotion in respect to that physical part then how can you move? You can move because the understanding of the knowledge of

transferring the energy of the plasma of the soul in another part is the same tool of what we call the brain and the information is carried. I can show videos of this. At the time if I had explained this, people would have gotten totally crazy over *how is this possible?*

K: it is very simple. If you listen to the present fallacies of the knowledge of the brain surgeons, if you take the part that is responsible for the movement of the arm, or you have a stroke where you damage the cells of the arm, you take the emotional part which is from the soul to the physical part you should be paralyzed. How can you get a man moving with brain? I have done this 2 or 3 times. All it needs to understand is that the brain of the man is the filter of the strength. You can transfer all the movement, all the emotional strength of the man to the spinal cord. You still have a man that hardly has any brain but as long as the soul is not touched then the man can function normally.

K: So you understand this is very easy. And understanding is that as long as you have managed to confine the soul it is the fields of the strength within the matter structure of the environmental condition. Then you can create physicality. There is something that needs to be clarified. This will shock a lot of you who never understood and if you thought you understood it, you ignored it. It was too much to even go across in the line of understanding. Denial is the safety of the job with the man. Let us look at it.

K: you moved from the earth into another position where you now know you do not need the clothes of the astronaut or the cosmonaut and where the physicality of the manifestation was dependent on the conduct of the operation of the soul in respect to the environment. Now hold on to your chairs because this will spook you. If your physicality in the new position needs the operation of the changing of the amino acid from nitrogen to potassium or another element, or creation of other dimensional physicality, do you think your brain needs to still be the same as it was made from the amino acid of the earth? Or, do you confine the soul within the fields of the strength of the position of the emotion so that you manifest without the existence of the matter levels within the brain for the confirmation of the existence of the physicality?

K: it is beyond your understanding or can you understand this? You always assume that when you carry your soul, the brain is still there and at planet

Zeus you can operate with 20 legs and 14 fingers and arms. But now on Planet Zeus the magnetic gravitational fields of the environment dissolve the amino acids of the brain of the man that is connected to calcium. So, are you going to lose the soul? Are you dead? Or do you understand the operation so that you can place the parameters of safety so that the soul can become independent of transition of the emotion to the physicality? Then you have matured to understand the next level of creation.

K: as I said in my teaching, I teach as a universal messenger to those that are beyond the human race and this is a community teaching. Those that have matured, understood now understand the next step of the intelligence of the interaction of the souls. Man right reach the stage in millions of years as he cannot imagine without his brain there is an existence. The whole secret of existence in the creation is to create that soul and if it is strong enough and it is done correctly it will exist anywhere in the universe without the need for transportation of the emotional side or the manifestation of the physicality unless it decides. Blessed are those that understand.

K: in principle what do we need to understand and what is missing in our education? Have we been educated the wrong way because we are too materialistic with the whole donkey, cart and jet plane? Ask yourself one question: *where does the soul go when the man goes to sleep? It is the physicality that shuts down with sleep, not the soul. The soul is operating 24 hours a day, 365 days a year. Ask yourself 'why do we die?' Can I live an immortal life? The answer is yes and that is how you decide to create the gap between the soul and the physicality so that you control most of the energies.*

K: when man goes into deep space you will learn something and that is that the size of the soul and the emotional part of the creatures shows the level of the intelligence and the understanding of the operation of the universe. A man with a big chunk of the need like the human race needs the physicality. (1.20.20 minutes). If you reduce the boundary of the brain closer to your soul, let's say come down by 2/3rds, then it means that you have understood half of the emotional brain _____(1.20.39 garbled). Bless you. Maybe we needed the shock to reconnect some points.

K: so the point comes: *have we wasted your time for 3 years in building generators and the lift systems, the cores and the coils? Or have we have chosen the path of gradually introducing you to the reality.* In the course you

pretend. Try to reduce the liquid water and see the interaction of your soul and how fast it can change the layers of what I call the ganses. Then try to connect yourself with what you have created and put amino acid in it. You decide the size. Then try to insert that you want to see a new manifestation of your soul in the core. Then you shall see a light. A lot of you have been pushing to put different ganses and different speeds of rotation; I always said it's the potential difference and the current flow difference that creates the magnetic..... What you see as a glow is the interaction of the fields of your emotion which is given to the core and it responds back to you. You become the earth with the sun from the man. You don't see the sun because you are stronger in the system of the soul than the system that you made. But you see the light of the interaction of the atmosphere.

K: I was explaining this to one of our teams in the last few days and I gathered that they did not see (understand) it. *What, you need the motor to spin inside, we need the motor to spin outside and how does it speed up and at what speed? I said the gans ball in the bowl and your emotion and your strength of your soul will turn the fields. Do not look for a physical rotation because then you have failed. Look at what the interaction of the fields create. And then you will succeed. As long as you look for emotional or a rotational part to be able to understand, you shall fail. Because you still have connection with the physicality, but the soul is too strong in the operation. The more you become detached from the physicality the closer you become to the soul. The Chinese yin and yang—the line is very fine between the two.*

R in Texas: thank you for bringing us to this point in the teachings. I have a couple of questions. In the teaching of the _____ in the world history there are two words: in the B'hai writings of Baha'u'llah' it says *knowledge of the soul is knowledge of God. In other words knowing the soul is equated to knowledge of God.* I am wondering if you could go into more detail about what that means.

K: in the writing of Baha'u'llah' bless his name, what he said is what I said just a few minutes ago. **Your soul is your creator, but the man is not mature enough to see his own soul.** Then it shows his lack of understanding of his own creation. **When we look inwards into the direction of the creation of our souls, we understand that the operation of the soul is the creation of the man.** We need to understand our own physical creation that is connected and is literally the byproduct of the interaction of our souls so that then we

can understand our own souls. Our physicality is the interaction of the soul within its physical dimensional environmental strength. When you go within the inner soul of the man then you have no other environment but the soul of the man; then you become independent of the physical dimension and the strength. The process is *would you like to be as an ostrich or a camel bird. Would you like to be the camel or the bird, or would you understand that the essence of the two has made the ostrich? One is the soul of the man and one is the physicality of the man.*

K: you have to look inwards into the operation of the soul and then you can translate the physicality to any dimension. And this is where most of the misunderstanding happens. We try to change the soul without the behavior of the physicality but in fact we have to understand the operation of our soul to change our physicality. Then it has been answered in the writings of Baha'u'llah', bless his name. Buddha, bless his name, understood. In so many of his writings and so many of his words we see this. But those who went to the next level of understanding comprehended part of the message. Those who got stuck with the physicality still go to the temples. The temple of the man is the soul of the man. You don't need to go to a temple; it is part of you. We see in some of the teachings of the prophets in South America that they understood the operation and in their guidance they tried to transmit to their followers people who could follow the message.

K: the reality is our biggest fear as a physical being is to understand that we are connected to an intangible entity and we have fear of it. It is the physical strength of the central core of the planet that gives earth the physical manifestation of the mountains and the seas. There are no mountains or seas inside the core in the Caroline core. But the operation of the waves of the sea and the fields they create reflect back into the core and with it the energy that is absorbed from the environment of the plasma of the solar system and transmitted to the center allows the center to manifest itself and position itself in a way that it is safe in where it is. This is the story of the chicken and the egg—which one came first? I bet it was the yolk and the white.

R: in the bible it says *in the beginning was the word and the word was with God*. There is the belief that they try to force the word to make a sound. Sounds have effects. What does this mean, *in the beginning was the word and the word was with God?*

K: what do you mean?

R: this is in the bible. Can you tell more about that?

K: I don't understand your question. Explain what you are asking.

R: what does that mean?

K: you mean 'the God?'

R: the words have some association with the beginning.

K: what, do you mean the word *God*? Let me explain something. You said you were B'hai and in response to a word I spoke you responded with a word. To a lot of people it means nothing. What does it mean in reality? Most of the writings of Baha'u'llah' are in Arabic. It was in Arabic and Persian. U'llah means 'god.' Baha means great. What does a word matter when used in ways we praise ourselves? It means God is great. Is the creator ourselves? Is it we who are afraid of ourselves and we have to hide that in different names? Are we afraid to see our own truth of who we are and how we are created? And the fear of it has pushed us to creating everything else except coming to understand our own weakness and fear. (1.35.22 minutes).

K: this is what I say all the time: *the man who goes to space has to go with the confidence of the knowledge of who he is and what he is, what he can achieve and what his responsibility is in respect to others. It is ingrained in us according to our culture and we see it and it is pushed more and more to the level that the more we can fool people the more we can abuse people. Maybe you found your answer. We are not preachers, we are teachers and enlighteners and enlighten so that you can teach and preach to yourself. This is the job of the Universal Council, the universal messengers.*

K: We don't teach because teaching will take you to nowhere and you will forget. If you understand, aspire to overcome your fears you will overcome the limitations of your own understanding. In the space it is not that if something is bigger than you it must be your creator. It is as I have said before *how does it operate. I understand this operation because it can't be very far from me but it uses different ways of manifesting itself.* It is the same gravitational magnetic field and in a different position it manifests itself as the Earth. Earth was in the same position as Jupiter but it was a huge thing with the same gaseous operation. In essence the seed has not changed but the position of the environment has changed. It is for us to understand—are we still Jupiter or have we become the Earth due to the time and the strength that we carry. Otherwise in essence we are the same and it is the same planet.

K: the fear of man has been the cause of the demise of the man and if there is no fear of death, *I shall never die*, it is because he understands he will convert to another man (? 1.37.50 minutes). He can use the means of doing something else in another dimension. Ask yourself a very, very simple question: *I am a physicist, a nuclear physicist and in my way and training of the matter of life there is no other way to put it than this: in nuclear physics we say the neutron in losing its balance, the field forces inside, divides into an electron and a proton. Now this will be the biggest question for humanity. When the balance of the fields of the physicality of the neutron of the body of the man in respect to his environment is balanced where does the neutron of the soul of the man go? Does it divide into another smaller or larger soul and manifest itself into two dimensions? Is there an end to the soul of the man and the existence of the man once it is created? Or have we understood the totality and become the creator because now, we create the proton and the electron. In the future the balance in respect to the environment, they divide into further neutrons and protons.*

K: So the question is: if you understand the physics, the vertical, nuclear, atomic physics and we speak so readily about the division of the neutron into the electron and the proton when it changes one part of its physicality because of the balance of its fields, and the environment has change, then would you like to change the neutron to the body of the man when the environmental condition, what you call life changes and you become a center of force and now you have a proton and a neutron, then what would it manifest itself as? Or would you like to be in charge and in control of this division and then you decide in the new position how you will be seen and what you will manifest yourself as.

K: in the division of heavy elements we get smaller, lighter elements in mass and the heavier element in mass and the collective mass of the two is near enough to the original before the decay. In the game of the language of the man he has fallen into the same trap of saying things a different way. Is the decay the death of the man? But the decay of the neutron wasn't the end of the life of the neutron. It became the inspiration and the source of the new life of the proton and the electron. And in respect to the environment it was in, now it was plutonium, and now it shows itself as zinc. Is zinc in essence the plutonium because the cycle of division somewhere it has ended up becoming zinc?

K: is the fear of man of death in fact in reality meaningless if you understand the truth about the creation and operation of the universal work? Have we or do we become emotion (?1.41.52 minutes). We aspire for man to gain the knowledge to deliver his own soul from what he may be or do in the future. We don't teach, we don't preach. We enlighten and enlightenment allows you to see the light and the path of your soul. (1.42.21 minutes).

John: thank you, I'm from Chester in Wales.

K: I spent many days in the beautiful city of Chester.

J: I have been working with your technology since the October when you released your blueprints. I have had a crazy time during the journey and I just want to quickly talk about the spiritual soul awakening and researching technologies as well as *Disclosure* by Dr. Stephen Greer. What resonated a lot with me from your teachings and I had a 'flash' in the bedroom. It was profound and it was like *seeing the light*. In one of your lessons you talked about unconditional love. I got a second flash when I thought of the unconditional love for my wife. Since then I have been trying to make decisions with my soul and trying to be connected with my heart. I've been on synchronistic journeys and been more in touch with nature. It's been a wild journey. I've been researching the spiritual side of quantum physics and cross referencing. I am getting good results from your technology and have put up a you tube channel. I believe we exist on all dimensions and we all come from the single point as fractals of 'God.' We are all connected to everything and we have lost the consciousness of knowing that. We are sharing the knowledge. I've used crystals and one with a wand. I have a titanium wand on my right hand. They all fit on a torch and I believe I have created a healing tool.

J: I have been getting motion with Magrav systems and picking up spinning fields in the house. I've picked up current from the roof down the cupboards to the kitchen. I thank all of you and I have some ideas for possible lift and geometrics with prisms and zero point. I have some ideas I need to develop. I would love to get involved with Rick more. There's not much support from people around me.

K: there is a group near London who are active with these things and Keshe technology. The problem is that what we see is a lot of people understand and join the foundation in different ways. After awhile their limitation of

the understanding stagnates because it conflicts with a lot of things that were believed and accepted. Now you have to try to unravel it and try to unravel your own understanding and then accept that what you understood was not totally correct in all ways. This brings the judgment point where people decide they cannot go any further. Or, the conduct of the response and it's back to new technology. Then they come back to the Keshe technology with vigor because now they have the chance to be away and then come back and understand more. The process we see in the understanding is to put forward for people to do things and showing different paths to the same point. It can be the cores, the coils, the reactors, the gas reactors, and the mixture of different things. We are a vast society of different strengths and intelligence. What I have done is to spread as many different ways so that in this totality people can find a point of connection that relates to them.

K: some people look to the path of the spaceships, some to the soul, some to agriculture and everyone is taking from this what they need. When I was in Tehran President Ahmadinejad made a very clear decision by my stay there. This puzzled me. *We do not want anything to do with medicine; you cannot practice medicine. All we want you to do is take us to space. All we are interested in is the space technology.* This puzzled me why a nation that could have access to everything narrowed it to one point. At that time it was a puzzle to me and it's still somewhat of a puzzle. But, in a way I can understand. In trying to primarily promote the space part of the technology they could see themselves to be elite. They could see an advantage in being able to do things that others could not and then apply it and by implication of it, dictate new positions. I understood this quickly when I was in Tehran.

President Ahmadinejad tried clearly to keep me out of the scene in Tehran and the achievements of the Iranian scientists as a group. Later on I understood his personal intention behind this. At the end of the day when I look at this 8 to 9 years later the intention for the space program for Iran has been a tool of peace for the KF worldwide. When we negotiated with the 5 plus 1 we didn't negotiate at a point of weakness. We negotiated at the point of what we had and what we could deliver. The 5 plus 1 wanted to join in and have some of the knowledge. In that 5 plus 1 China and Russia took part in it and they understood part of the application. In reality the rest have sat on the sidelines. And so many times I wonder why nations like the US and others have the documents and the same things and they don't understand.

K: it came back to the light. I took the light to Iran. I enlightened the scientists and that is all I needed to do. People come in and they expect things and by expectation if it is not there then there is something wrong with this technology. When you see the picture and understand the totality then you understand what you have achieved and how much you have been shown. Then you can go to the next step. Many times I sit back and look at the whole and where it is and how I can guide humanity. The reality is that humanity does not have the same intellect. And that is the problem. We try to enlighten but not everyone sees the light at the same strength as the others. Try to understand according to your intelligence and in so many ways the soul of the man is the best guide. My job is to take those who come to understand the operation of the soul into the space of the universe because the soul is sacrosanct and is not tainted and it does not kill or destroy.

K: in so many ways we say you are right, you signed the peace treaty. It means we want you to understand the operation of your soul. When the soul is at peace the soul and shall not kill because it has positioned itself and it will never destroy anything. It is a contract between the man and the soul of the man in a way that his own creator ____ himself. (1.57.01 minutes) Any other questions? Thank you very much from Chester; I've had many beautiful days there. I like the wall of the castle. You can walk on it and then you understand that those walls have no meaning any more.

J: we need peace. Looking at the technologies there is so much that is suppressed and we should have access to what is already known.

K: with what we have opened up in Ghana and with what is coming in other countries you will find that sharing knowledge will become accessible very, very rapidly. The teachings especially now with the masters in agriculture who will use the KF center in Ghana as a center for teaching on a year round basis will share with people worldwide. Sharing these kinds of knowledge in science unconditionally creates a lot of problem for those who were hoping to make money out of the technology. This is where the values are. If you teach freely enough there are people who can do parts and go back to the barter system. *We are prepared to do this and I do this well, so if I give you so much plasma can you give me so much gans back?* It is a new way of looking at it and operating with it. We have to see how we change our own understanding and Understand our own physicality and soul and what we call our creator. (1.59.25 minutes) Thank you very much.

Rick (R): Mr. Keshe.....

K: oh you are back Rick. I have to leave in 45 minutes as I have a meeting. In Ghana we are heavily tied up with a lot of work for the promotion of the KF and the work of the KF. Very soon we will welcome people from East and West Africa to come to the center. The work is going so rapidly that with the new building and other buildings which are given to us by the governmental organizations for the development of the technology and this takes a lot of organization.

K: I have to thank Benjamin who is working relentlessly day and night. Without his work the achievement of the foundation in West Africa and Ghana would not be possible. We need to bring people in to be able to support the bigger structure and the only problem we have is to give the Africans confidence that they are doing it themselves. They have lost their confidence in themselves. They see different opportunities as somebody having to do things for them. We lack a lot of management. They could be abused in their operation so this is what we are trying to teach. In all the meetings we do we try for them to understand that we bring good management teams out of the people.

Rick: that was one of the questions that was regarding the stand alone generator unit and how is the manufacturing going.

K: we have are testing it because we saw a failure and flaw in the testing. Hopefully it will go back on the board in the next day or two. We had a failure in the system that we couldn't see. The design of the solid state generator is amazingly simple so we have to complete it so that it stands for certification. There was a flaw in it that we saw and it is getting fixed in the next day or to and then we send it in for standardization and production. There is a problem with the solid state; the process is an amalgamation of 2 or 3 systems. The interface was a problem and now some systems cannot take certain fields. Hopefully it has been sorted out and I would like to show it in the next couple of weeks. People say we should not show it in public because people will copy it and all the rest. We share everything completely. It is done and completed and we can show it to you now. The system showed a weakness or failure and then came back on; I'm trying to understand how. We will try to do a blueprint for the generator. We will not be able to manufacture enough to supply the whole world.

K: the Magrav people come in and run with it and if there is something wrong they say there is something wrong with the KF. We share the knowledge freely. Be patient and we will get it 100% right. I don't want the

same mess we had when we started with the Magrav units. People said it didn't work, but then they did get the reduction on the electric bills. Just because they said it didn't work then they couldn't save face by coming back and saying it did work. There are millions of Magrav units that have been made by people around the world. None of them come back; they all take the savings and they walk away.

K: there is something while you are there, Rick. We announced a couple of weeks ago there was a change in the management of the KF. We have changed the internal management due to the development of progress. We have done this many times. But, this time we do not announce who we put where and how because of the misconduct of the people sitting around and trying to intimidate and put our management team under pressure. We are keeping the management team very close. Most of the top management team knows who is there and what is going on. That is all that matters to us. People like Armen are at the head of the KF and we work as a team with this. The other people who come in have been moved to management positions where we have seen their competence.

K: We have seen changes made rapidly and KF is growing rapidly. KFGhana will have 2000 to 3000 people within the next year. You cannot be one man trying to do everything and the responsibility is being spread around. People are taking charge of these positions and showing their competence. Every organization changes management and it does not mean that we let people go; they just take new positions with new parameters. We are expanding the factories that are being operational and that is beyond my control. Our main objective is teaching, research and development. And, we have brought people in the past who have abused positions for their own self ego.

K: The top management of the KF knows who the people are and where they are and that is all that matters. We don't need to answer to the outside and bring attention to them. We need to carry on with reorganizing where they sit. We are here to sit as guardians with the KF and not enforce. Let the young come and show what they can do; we are here for guidance. We have changed management for the betterment of the KF and it's all internal. We will not bring anyone any more from the outside; we are looking for people who have been with us with a track record of operation. We brought _____ and we saw the mess they made with their lying and cheating. (2.07.19 minutes). So, we are looking for people with knowledge of the

technology and very senior management in KF. The internal change has taken place in the last couple of months and now it is in the hands of very competent people over different sections.

K: the position of people like me, Armen, and Rick and others stays the same. We are there as guardians and we are there to advise. We carry a lot of knowledge and we don't need the titles; we are there to guide. We are wherever we are needed whether it is in the factories, the research and development or seeing problems through. I thank all of the team members of the KF at the top level. They have been there solidly with us and that has made us a successful operation. The story of Ghana is unique and it will repeat itself. You should see the outcome of these developments and we have responded to the need of the nation and not for us to deliver what we wanted to show that we have something. This is what I said last week: try to listen to the needs of your nation and use it. I would like to thank Paolo and especially Giovanni in Italy.

K: We will report a very significant development in Italy in a very short time. The team is working relentlessly in different directions in Italy. Italy is our home base. But last year I went to Dubai and you will see results of our work in the coming time. We see the development of change in different ways for us and now in Africa we need to make a solid base. I will stay a few weeks or months here. When it is up and running, I will go on to the next country. That is how it is going to be. The technology where I go seems to become solidified and grows rapidly. So, here we have grown rapidly and I will be here for a few more weeks to see that the base is solid and we have enough ground support. Then we move on to our next destination. I know where I am going and I am delaying my trip until I see Ghana fully up and running with strength. We welcome the new government of the president and his direction for the nation includes the new science. This is how we stay; we don't escape we just go where we are called for the development.

K: we go for the development and those who say we are escaping want to escape themselves. We have received a lot of information about DL in the past few weeks. His picture has been on the internet regarding his sexual behavior and it shows his brutality. The international police are clearly after him. They have started their procedures. How can you put these things up as art on the internet and show a 6 year old child being happy in a box? Please go on the site and find and report to your police. We need to bring this thing

to an end. It is very important for us. We have released pictures and things from DL's own website and this was the biggest one. Now the security services are looking at how these people are operating. They are hypnotizing children so they don't remember. It is clear what he has done and we have seen this in many of his shows. This is important for us. The arrest of this man is the priority but they are looking at the people around him. He is well connected in circles in what has been talking about abuse very proudly. This man is putting a lot of sexual tools on the internet in the form of 'art.' It is amazing how he has been allowed to promote and now internet operations are looking at how a pedophile has operated this way. There is a line of condoms that are shown as a form of art. This is being reported to the security services more and more in understanding how he operates. Please keep the information running to the security police outside.

K: there is very serious talk at an international level that Belgium citizens especially men have to justify their trips to certain countries. This is an option for stopping the pedophiles from moving around. We have spoken with the security services and there is a huge option that Belgium men on the internet and traveling abroad will be heavily monitored. We have seen things expand rapidly. We need you to inform the police and take your own pictures of what he has put on the internet and give it to the police. DL asked for a picture of children to be taken for free cinema. This is escalating very rapidly and including the people who are around DL.

K: we are told that there is negative trafficking and that includes the people who have been around him. And so please stay alert. Look at how in the name of 'art' children have been abused. There are very interesting and devious ways that come under the name of 'art.' The pictures are all on the internet. We have seen everything this man has done in the name of art to attract people to his own behavior. We do not share it here. Just go on the internet and you will see the state of the abuser. The same is going on regarding trafficking of children to the US. You have to inform the CIA and FBI that this is going on. The site is called 'scamkeshfoundation' and was on Mr Tumani's camera and he has been sacked from his position for sexual child abuse and using the internet for trafficking children into the US. Use the KFscam.com as the source for that man. He has been abusing children while using my name. One was Sterling and the other was DL along with many others.

Rick: there is a question from Trevor on the live stream: *why do some religions worship the planet Saturn and why is the Iranian technology called Zohar which is apparently Farsi for Saturn?*

K: I don't know; you will have to ask them. It has been something the furthest man could see and give a name to. (Saturn). The path of Saturn is historically kept and the truth about it is not there. A lot of the writings we have that go back to the Torah that is a collection of what came before Moses. The reason is that you have to understand the interaction with men of space is not something new but understanding of the knowledge for the man at this time that space is open was the manifestation of the magnitude of the vision of the man and how far he could see. And he could still see physicality and tangibility. Saturn is what we see differently than the others. With all the planets we see a sphere. With Saturn we see rings and another dimension which at the time for man was something that was bigger than he could understand. There is no other reason.

K: don't forget that Saturn and one or two stars on either side of it carry the rings. Even the earth has the ring. As we go further to deep space we will see it. This is the property of the gaseous planet that has been created on a multitude of layers. Saturn has this abnormality which is not understood and it was thought that there was something very important about it. There are no other reasons for it. You look into the sky and you don't see any rings, but you see rings as wings that are free to fly. If you go deep enough into space, such as going to Saturn, then looking at the earth you will see the rings of the earth. But now our rings are very much diminished because we have a central core of molten metal which interacts with the gaseous and creates a second field of interaction. It manages itself as a ring. We have a ring; even the sun has a ring. But you will see the ring of the sun if you go out of the solar system into deep space. Then you will see it because it is outside the shell. It comes from the interaction of the matter state gans or plasma in respect to the other things which are the magnetic field strength of the environment wherever the entity is.

K: you have to understand that the Middle Eastern culture is a very sentimental culture. Emotion counts more than the physicality. Look at the Iranian poetry and the poetry and languages of the Arabs. Look at wherever Islam (? 2.19.49 minutes) has come. This is why we see fanaticism in Christianity, Judaism and Islam. Because they have learned you can play with emotion.

K: If you look at all of it, it is playing with the emotion of the man. It doesn't work with the intelligence of the man. It works on the premise that you detach the emotion and work on the emotion part of it with religion. Anybody who understands this makes a lot of money from it. We see this in Ghana now with churches. They are not Church of England but with churches opened by any man who felt he could make money and has built a church. There are big churches here. And the church loans money and everything and is a corporation that relies on the weakness and lack of understanding of the man. Several people have two faiths—they go to these churches and they go to the local priest. They have counted on the 99.99% of man's lack of understanding about his true self. So they can play and create another church.

K: It is very strange. I was looking at some of these events in the past few years. Go back to the 19th century and look how the Germans decided in Germany and Austria that the Jews could have a state of their own. They went and bought any farmland that was available. The Rothschilds financed the purchase of the land. When they bought enough land they started closing the villages and started fighting. They became the terrorists and the first bomb went off in Palestine when the British set it off. Nobody in Palestine knew about bombs or this kind of terrorism. That was the Jews trying to get rid of the British and the rest of what with them.

K: so, the terrorism we call terrorism today started with the Jews trying to get their independence from the land they bought and wanted to hold. Now that the Palestinians and the Arabs are trying to get back their lands to what was taken by terrorism, now they become terrorists. Now the Christians using the unrest between the Jews and the Palestinians and Arabs create more terrorism. Why don't we have this in China, India, or South America? It has become one big money pot using the emotion of the man and then the rest is the mayhem that you see. All the uprising is just in this cluster of the Middle East where the temperature and the condition of the beauty of the environment has brought a lot of sentimentality. The religion works on this and has understood the weakness of the man between his physicality and his emotion and they are milking it. It doesn't matter what you call them—mosques, churches, synagogues or whatever you like.

John: this is John again and I am just inquiring about when you were talking; my background is engineering with a degree and teaching qualifications. I may be interested in a position with your foundation.

K: you have to do this where you are and where you live. In Ghana we made a deliberate decision that we only employ Ghanaians and we already have up to 60 scientists. We are only targeting for masters' degrees, PhDs and professors in the universities. We are targeting and bringing the elite. The reason I have done this is that I have a long history with Africa. I don't want to bring in important people here who are foreigners. The Africans have lost their trust in their own strength and their confidence in their own abilities. It has taken me a month to try to explain these masters and PhDs that they have the right, they can think and they can bring these things in. A few days ago I put them into different divisions and then they created among their expertise the team they have. I said that now as a team you will find the solution and the minute there is a problem you have your direction. You have your own sections and you are managers.

K: Then suddenly people who came in who were timid now see themselves being in a position where they can do something. In two weeks I have seen the change. We don't want to shift people from one part of the world to another. We like to share knowledge. That is what we do. Sharing the knowledge allows the development in the nations. In Chester there are huge refineries. We see huge problems with Shell refinery and the others. We see huge problems in Nigeria with petroleum and now a team of these people are working and finding a solution in the plasma technology for cleaning up any oil spillage.

K: And it was interesting. We walked in with Benjamin yesterday and there are cops and a couple of them are trained as petroleum engineers. One is a petroleum engineer and one has a masters' in petroleum engineering. It is amazing with what they came up with the first test. We have seen the avenue in the first test for cleaning up the mess with petroleum. They showed us some in a spoon and said *look, it has changed*. With what we have available to us in Ghana because of our position it takes us 2 to 3 days to get the full chemical breakdown on the material and what has changed and how can we use this? This has built a lot of confidence and we like to share knowledge. But I don't like to ship people; this is what they have done for centuries and out of respect they become dominators.

J: I have family and children here.

K: try to spread the knowledge locally.

J: I have been disclosing information on facebook and have drawn attention to myself and I've been passed over. I may move back to my home land in Lancaster shire around Leland.

K: I have been there many times and have a friend there. I lived in Manchester for 20 odd years. The problem is that KF products will come out and we have done everything and in the next few days we will release products that are only for African nations. We don't need the clean water and other things in Europe that Africa needs. But some things can be done in Europe such as the creation of the soaps and oils. We have a team set up for disinfection in the hospitals. There are huge numbers of people dying from hospital infections. We are looking for research on this for the African nations because bringing the sterilizing units in is very expensive. The replacement parts are very expensive. Then you have a system that sits there and doesn't work and then the money isn't there so it sits there for another year. The sterilization units become meaningless. Then you have the radiation contamination and you have to buy huge sources of cobalt.

K: so what we set up was to do the total de-contamination within the hospital where the surgeon take a knife and drops it in the box; the nurse picks it up and sterilizes it and hands it back to the doctors. We know this works and we can increase this to an operation of a few section. They can move the sterilization to another part of the hospital. This came out of research in Tokyo. I was explaining that we see from the Tokyo research that there is a threshold band. It is not that you kill some of the germs; there is a threshold band. This means that we lead with certain products for cancer and nothing happens. Absolutely happens for 5.5 hours and somewhere between 5.5 and 6.0 hours something happens. There is one 'flick' and all the cancer cells are gone. They have disappeared.

K: We have done the same thing with another component in the same cell, the Petri dish. With this the report came back very quickly from the lab in the university. They said they had seen change in one, and the other one didn't work. I told them to give it time. They came back 24 hours later and they said that at 23+ hours everything changed again. And it's a threshold level. Now we understood something interesting.

K: The research in the Italian laboratories and the Italian government that we will announce next week we saw the combination of different ganses in a specific order can do magic in cleaning up the environment. The report was submitted the day before to the highest court setting in Italy. It had our

document of decontamination and how scientific it is from different government laboratories. It was one of the highest courts regarding the environment which is a highly volatile situation in Italy. (2.33.17 minutes). KF has become very powerful because there is submission (of documents) by the government regarding the technology.

K: look at what is needed in your area: what is the demand? We are looking at the big crisis of plastics everywhere at the moment. How do we change the plastics? We have set up a team again and we are not looking at burning or shredding the plastic as they do in the matter state. We understand that the CH bond has a strength and now the researchers here in the factory build a unit to put the plastic. Then we change the magnetic gravitational environment of the room. Will we see hydrogen, carbon or sugar as energy out of it? We will not come out with a bag of sugar but with the field plasma. In a way we create the field strength of positioning so that the plastic automatically converts. These are the solutions we need to look for; now we understand the science.

K: we are doing what is needed locally and this is the job of all the KF. There are seven billion of us and none of us can become controller over all. That is why we do everything correctly and we look at paint and block construction. Power supply in Ghana is a huge problem and they are producing electricity to keep a very few people cool with the cooling system. Now we are looking into the construction of brick with the Atomic Energy Commission. When we can paint a wall the room stays at 22 to 24 degrees centigrade. Then there is no need for air conditioning and there is huge pressure taken off financial resources.

K: once we do this for weeks or months we will have testimonies from those of us who have done these things in the background. We can change a lot of things for a lot of government. In the United States, the Middle East and other areas if the use of the paint is compulsory on the outside of the building then no air conditioning is needed inside. Let's look at the technology in the full application and not just wait for one power supply or Magrav supply. Look and see what the need is in your environment and what is causing damage. What can we bring with new understanding; this is what you can bring in on the physical dimension.

K; Try to see what your knowledge and expertise do and we can support you. If you want to test materials send it to KF in Ghana and it will go

through all the checks and we can assess what you have developed, what it does and what the components are. We will charge a nominal amount to have access to this. But around the world you won't have access to this so we supply our own through KF. We can confirm the technology more and more. The new building that was given to us gives us the ability to produce every laboratory for every application of the science. The factory we are moving into is 20,000 sq meters. We grew out of where we were in a month.

K: look at your local demand and what is needed. Technology is not just one generator or Magrav. Look at the full supply—the agriculture side and more. We have sent plasma water to be tested to show what is in it. The scientific test is pure water; there is nothing that we can detect with present systems. What we have done on our labels in Ghana we have the ingredient: *pure water*. There is nothing else in it but when people drink it they drop their blood pressure, the blood sugars drop and whatever. This is the problem the FDA has with KF work around the world. *You show us the proof; this is the water*.

K: I was discussing this with Armen and our KF Arizona yesterday. None of the waters you buy around the world carry FDA certificates. We are the same. In no country at this moment of time when we searched all the water imported to Ghana did they need an FDA certificate. We have given our material to scientific labs at the highest level and they tell us it is pure water. we don't need FDA certification but because the way the water is people have the effect of going to the mountains and finding waters that are good for the eyes or the kidneys. So now, we become the creator of the mountain in the water bottle.

K: the process is to understand and stay within the role. Ghana will lead the KF world wide because of the facilities and the openness of the scientific community and the government. We work openly with government scientists and knowledgeable people at the highest level so they can see the changes. They follow the changes themselves. This is the beauty and why we do so well in Ghana. 90 to 95% of the staff at Ghana Atomic have been touched by the use of the plasma water and have seen the differences in themselves and their families. The issues aren't if this is true, because they have tasted and used the water. They believe in plasma technology as a science.

K: two days ago we were talking with our workers who are all scientists. I was told there was someone waiting and I said I would finish the discussion with the scientists. There was gentleman sitting in a chair waiting. He said he wanted to thank me. He was sitting there with the crutches and he used the gans the way he had been told and he was walking again. So he came to thank me. He was one of the directors of the Ghana Atomic. I told him he didn't need to tell me but to tell the masters' students who are working so they understand they are making a difference. They know who you are and see you. Explain to them. He spoke to the students and the factory people for 5 minutes. They were so proud that something they had made had made a change in the life of one of the directors.

K: Benjamin has done a lot of work for people to feel and live the plasma technology. There are other people who never done anything or made a single gans for themselves. This is what you have to do; see what it is you can elevate. There are 7 billion of us and you will never run out of time, business or customers.

Rick: Mr. Keshe you are running out of time for your meeting.

K: carry on; you can teach without me and sooner or later I will not be here teaching. Do not stop sharing the knowledge with one another and thank you for the framework of the KF>

Rick: we can go for awhile longer.

K: you do this on Wednesday and I don't see why you don't do it on Thursdays. Thank you very much.

Rick: there are some remaining questions for Mr. Keshe.

J: are there any talks with the Arabic government regarding this knowledge in the last couple of months.

R: I don't know if there are.

R: another question: how does it come that with the 129 Tesla fields that were generated a couple of years ago and are being tested at the laboratory at spaceship institute. *How does it come that with the 129 the fields that were envisioned were clear and almost physical and now when I go inside it seems to be small and I can't hold on and shift it each moment? Thank you.*

R: I'm not sure how to answer that as it is a personal thing for him. Maybe there is a general idea.

J: on the personal level I can feel shifts that are going on like a core. I have been tapping into meditation to stabilize the shifting to help with ideas and

synchronicity and shamanic soul journey that I did a year ago. I have seen technologies from different galaxies. I am trying to tap in and I'm not sure if that was how Nicola Tesla was doing his work. I feed the birds every day and I have pigeons, robins and the rest. I go at garden and mediate. And then I start working and it seems that things when I am relaxed things are different and things seem to work without having to think too much. It is being in the moment. If you meditate and stay centered that is when ideas come and the universe shows you what you have to know.

J: I'd like to share more like the crystals. There are some with hexagon and pentagon that store charges. I'm trying to work with these geometric structures. There are ratios and there is information such as using aluminum and 13 as a key to unlocking certain aspects of calculations. Aluminum conducts plasma well and is the atomic mass of 13. I did 89-144 on my coils. Keep in the 9s and be consistent. The Fibonacci ratio is 89...144. That seems to flow more with the universal growth speeds. This is some of the information I have wanted to get to you Rick. I have the calculations. With the pentagon we get the sq. root of 5 and you have 2.2, 3 and 6 and those added gives you 13. You have hexagon and you have sq root of 3 across the points which is 1.7, 3 and 2. Add those together and you get 13.

J: I have an idea for a potential reactor. Instead of the Merkaba you can still incorporate numerous ways to get the technology to work. I'm looking at the pentagon with the 5 ratio at the bottom and then across the two points 1.6 and 1.8 and multiply the distance, then the height of the reactor, the top core, gives you the sq root of 3 which is the 1.7, 3 2. Then if you invert them and find the center point of that gravity and the mass of that prism and invert the second pentagon and find the center point of that you have an opposing reactor that will have the number 13 in the center core. I believe that 13 is the key element to unlocking knowledge along with aluminum. It conducts plasma so well. It is the atomic mass of 13.

J: I am making links to certain things. Also on the pentagon when you add all the angles you always get 18 or 9 and that stacks the 9s. That is some of my knowledge so far.

Rick: some diagrams would be helpful if you can do that. Have you made any reactors based on these designs?

J: I'm starting to build them and on how to spin them. I'm watching you guys to see where you are and I've been absorbing knowledge for many areas. This is how I work. For awhile you are taking knowledge in and

meditating and you will have a burst of doing some work. I don't like to waste copper and other materials so I have taking my time to get a better understanding of what is going on. I am getting perpetual energy off my kitchen work top. I've done a small spinner. I have a crystal spinning on a computer fan and I sealed it with plastic so there is a vacuum. So I need to start running this.

Rick: the Keshe plasma reactor group is a good place to show that.

J: I work on Tuesdays so I missed it.

Rick: we are there every week and have been for 3 years. We like having people show and tell in the world of Keshe reactors or different devices and technology. This is available on the [livestream.com/kfssi](https://www.livestream.com/kfssi) and it's under the workshops.

Rick: everybody is shy until they come out of their technological closet. Then we can't keep them quiet.

Libby (L): I wanted to add when Mr. Keshe was talking about our souls if it is better for those of us who may not make reactors but try to better understand that we are the reactors. I had a wonderful experience a couple of days ago when I was walking to the store and I put my knee out and it was painful. I remember that everything is in the air so I sent love to my knee and then pulled in the elements I needed to balance myself. The pain was gone! The pain hasn't come back and I realize that we are the reactors and we our own spaceships so we can practice our inner work and we can understand the internal designs that we are. Wouldn't that be a good area of concentration?

Rick: yes, the private teachings over the last year or more have put more and more emphasis on that aspect to bring that out more.

L: I want to remind everyone that everything we need is around us in the air. We are so powerful and we have forgotten and have been so dumbed down. Without the virtual family of KF on Weds and Thurs there are so few people we can talk to about this. There is such a strong spiritual aspect to what Mr. Keshe is teaching. I want to remind people of our willingness to change.

Rick: it isn't just about the technology but it's also the teaching and movement. You don't have to have reactors to participate or even to make the gans and all which is interesting and good. Lots of people do this, but people who are advanced will come back and repeat many experiments in so

many different ways. There is so much opening up with this technology. At the same time as Libby says it comes back to ourselves and our own relationships with ourselves and what do we mean by our souls and who are we and why are we really here? These things come up during these teachings. It's part of this and we are part of the picture. In the old days the experimenter wasn't part of the picture; it was all about the experiment. (3.01.44 minutes). Now it is about the experimenter and what your intent is; what do you want to create?

R: you become the creator with your environment and in your kitchen interacting with different gans. This is part of our natural process as humans in turning the nano materials and foods into gans inside our bodies and transforming that energy into plasma. Besides the body what about the soul as Mr. Keshe speaks of? Do we have a soul? Are we in a human incarnation at this moment? What lives after the body drops away if any thing? These questions keep popping up. We find that the amino acid on top of the gans is interacting with us on an emotional level. It's a different ball game and we have to learn peace and how to treat one another on this planet and look beyond the physicality of the human beings around us.

Norway..Thjorn (sp?) (T)- I want to share a view, the simplification after you have done one coil. The coil is referred to as a super conductor to have the property of super conductivity. Look at the inner core and outer core as the output. Even if you make a coil with positive and negative, magnetic and gravitational, you realize that those two are very much attached to the solid plasma. You can imagine looking from the center of the coil and out, the output is physical. But if you go from the outer core looking in, then you see the free plasma. This is very important realization as many people are thinking of magical numbers and designs that have to do with the perfection of the pyramid, it is actually done. It is in our technology and it is not that easy to see. It gets complicated to understand the difference with the nano material and the gans on it. So it's easier to see from the center of the coil where the gans coil is on the outskirts which is physical.

(T): When you connect one coil to 3 coils then you are after free energy very often. But there is something wonderful to know about this. If you ever make a Magrav unit that is initially 3 coils connected together, you still have 2 outputs. But if you were to put food ganses on the top of the metal mixtures then you will have very special vortex. There are quite a lot of different points of observing spots. One is from the center and out; one is

from outskirts of the coils, either one or 3, and if one it is referred to as health. Look from the outskirts of the second or last coil and it is easier to realize the vortex. The connection between the classical capacitors when you add the cap on the top (the capacitor produced with isolation foil such as aluminum foil) then you have another reaction from the nano material and the gans. This is very specific on the Magrav.

T: When you put that mixture or connection you can still keep the food gans in the mixture. What I have seen is that when you have food ganses one would think it would not add much to the electrical point of view. But, it actually adds to the richness of the vortex. So when you add the vortex and the output together then you have the easier understanding of the totality around the Magrav whether it is one or three coils.

Rick: this is certainly a good point, this viewpoint. What is the viewpoint? Where does our attention come from? Is it from a point in space, from our eyes, our brain, our heart or our toes? Some people talk about a viewpoint above your head that gives you a natural perspective. There is a talk about doing remote reading where you project your body outside the body to a remote place and gather data. Or the other case where you actually identify with a different body that can move through time and space and go on journeys as Mr. Keshe was saying. Maybe more is really happening when we are sleeping. What happens when we are sleeping? What happens to our soul when we are sleeping? These are important questions and this in a way is the only game in town. Otherwise the physicality comes and goes and is temporary and in a state of illusion most of the time in one way or another.

T: all the different viewpoints, if one of them had the same intention that is the whole point. If you make a Magrav for example and you compare your Magrav to your body, you realize this doesn't look like me as a result. It can't be anything but yourself, even if the design doesn't look like you. The vortex is made by a person. The difference between my old Magravs and my new ones is that now there is a balanced vortex. Is it possible to make a Magrav with a tilt? Absolutely and when you have a coil with a drop shape more than a circle then it won't work that well. If you misunderstand the connection with the capacitors then you can create a tilt in the vortex. It works as the vortex works slowly but it can work better and faster; that is what I mean about the equilibrium and the vortex. But, it's interesting...the vortex and point of view. I am afraid the experience will tell you....I can't see how this can be intellectual. You have to test it out and see what the

difference is. How would it be with the tilt in the vortex and this is not working that well with the magnetic field .

Carolina: Hi Thjorn (?sp), Good Morning everybody. I would love to bring something very important back to all of us if I may. Don't make this so complicated for people. There are a lot of people who cannot follow you and may not have the so called intelligence to understand. Because a lot of people have to go back to the initial 'why' and the start up. Mr. Keshe repeated it this morning again. What is the start of all the ganses, the reactors, the Magrav systems, the energy systems? It is to supply people with what they need and what they are short of but with the right intent. Don't make it so complicated; when you wish and when you create then you generate and you uplift everyone and every single person and soul within miles around you. This is something a lot of people have not realized. Your soul is working to what you create; your creation is your intent. I have posted quite a few times and I don't see anyone reacting on it and I keep wishing.

Carolina: I have been wishing and my wishing has been followed up with a lot of knowledge seekers. I see them posting and connecting with my wish. My wish is to go to the benefit of those who are hurt and harmed and short of something. Or maybe they are not in a position to stand up for themselves. If you could only go back, this is my wish for today, I wish a lot of people would wish more every single day to create the change because you are the creators and the feeders (? 3.17.20 minutes). I wish all the knowledge seekers especially a lot in this special teaching this morning, please go back to the basics and go back to why you started creating these ganses and the beautiful feeling when you noticed it was working and it was doing this and creating that. Remember your joy and pleasure of seeing the benefits of it and then the benefits and pleasure and joy of sharing this with so many other people. Don't stop sharing and creating and passing it on. The more people we reach with our intent, the more we uplift other souls and the more we reach.

Carolina: I was passing here in Ghana and people said many times, *oh these are the shanty towns*. It was something that you weren't supposed to see or put your foot in. These exist all over Africa. They are known by the name they were plastered with...the shanty towns. But I was on a higher road and I could look down to all these little roofs everywhere. I said *you know, it looks dusty, but quite nice because they have created their own little homes*

and at least they have a roof over their heads. And a lot of people don't have a roof above their heads. It's the matter of how you look at things, and analyze and observe them.

Carolina: I know Thjorn (?sp) and a lot of people go very, very deep but what are you actually doing with your Magravs which are sitting at home? Do you keep the old ones in your homes or do you pass them on to other people. Do you share and give them out so other people can have the benefit of them as well. This is a creation process to give to as many people especially now in the winter where it is very cold where you are. Help and support neighbors and family members and people you don't know. And if you have empty houses, buildings or apartments and bring the Magravs there and share your property. Get people off the streets; they don't need to be in the cold. At least give them a roof over their heads. You can do so much; don't be scared to do it. Take the first step and so many other people will follow what you can create. Every blessed soul that blesses you will give you the courage and energy to give more and to relieve more people from pain.

Carolina: pain doesn't need to be there when there is a disaster; it needs to be on a daily basis. Go back to why you created the ganses and why you got beaten. Everybody was changing their kitchens, garages and bedrooms into workrooms (? 3.21.04 minutes). They are still there. You have followed the steps but generate more with that and give more out. Go back and remember when you were stung by the bee and you always remember the pain. Please remember the joy of the ganses, Magrav systems and everything you have created with your own hands. Please give (what you make) out and don't hold on to anything. There are not only humans suffering, there are animals suffering. There is just so much which you can hand out and you can relieve so much. Don't make it so complicated. We know you all want to survive and something that is bothering a lot of people is money. But when you generate you generate more. This is something which we tried to get across.

Carolina: a lot of people get lost in setting up companies and production. I have seen what people are asking; I say *my God how is this possible? They are trying to advertise for somebody creating Magravs and doctors and more.* People cannot afford those things. Only a small amount of people can afford these things. I always remember when Mr. Keshe was coming after me. Remember, he asked you to stand in the middle of the Magrav system? I have received mine from Dr. Klaus and it's a beautiful crystal.

How many people have carried on with putting the crystals in the Magrav systems? You are supposed to create the connections between the Magravs with your intentions. The more you spread them out the more you will connect with more people. But, it is always coming back down to the same step, the first step. Go back and create what gave you joy to make it. That was the pleasure you have received from making it and the source (?3.24.08 minutes) you received from it and the benefits you received from it.

Carolina: I made a (internet link) platform with Vince recently and I posted a link on the Universal Chat rooms on my facebook. People can go and put your testimonies down. We need feedback on how you have created the Magravs and what you have done and achieved with them. Please, a lot of people get more ideas from how and what you have done to do something in the same direction or they come up with other ideas to expand the knowledge. I see you are all busy and I see the diminishing of the Universal Councils. They are not being used to bring the positive. It's like a newsroom of what is going on everywhere. But they are not being used so much any more for contributing positive things so they can make the change. The testimonial, the first one was more for health and how you can express yourself and how it works. That is one step. I am trying to get the second one to see how many people are donating their work back into teaching, sharing and giving. But I want your work on it that other people can get beaten by this little beautiful thing and think they can do this as well (or better).

Carolina: I recently got Mikey, Douglas' wife who comes with ideas and how she is going to distribute and make things and make sure its coming back to the foundation. I noticed she was miscalculating something and I asked her to please recalculate because if you give more then you don't have to feed back so much in money. I prefer you to make more systems and give more to other people.

Carolina: I am still calling for huge support for North Dakota for the Indians. There are people on the road and please send them support by any means you have if possible. They are sitting in the freezing cold, icy weather to stand their ground so they don't lose their heritage. There are so many beautiful stories; make your story beautiful as so many before you. You have received all the tools. Go to the joy and not the complication of it. Share and especially share with children.

Carolina: I am thanking every single person who has been designating their time on translating, teaching and creating the platforms to teach the teachers. You are all working in different levels and building it up. But give feedback to the foundation so that we can show the way you are doing things. It is so beautiful. Don't be scared of donating your time. If you don't want to be known, choose a name and post what you are doing; you are donating it back. I want to know and other people want to know. You don't need to stay in the shadows. It is time for you to stand for what you can do and what you do because it is beautiful. Don't hide. And it's not only the ones who are always coming to the front who are important. No—every single one of you who have been transforming your kitchens and garages—you are all so important, but please step out of the shadows and bring your knowledge forward.

Carolina: You might think it is nothing but there are still people who are just starting and don't know anything. I face this every day and you have to restart from A to Z because they don't know. So, if we bring the testimony on you started and how you embraced it and the reason why you embraced it, and what you have achieved and are still achieving, that will be beautiful. It can be like a red line to show people the path to start walking on. Actually it is your intent of what you want to do with it. This is not depending on your intellect but your willingness and then your wishes with it.

Carolina: Remember what Mr. Keshe said and I don't forget what he has said and I have tried this so many times: *your wish, if it is just, if it is balance, if it is in the benefit of what the purpose is supposed to be with your emotion and this means you know the experience of how bad it can be because it hurts, when you create your wish within 14 days you will see the outcome of it.* Some of my wishes have been so big, but they have been achieved. They may have taken a little longer but I keep re-posting and adding more people so I can create a bigger plasma field of this wish so it can reach its target. So, if you see wishes coming up, don't be shy but be proud, because I know when you make that wish it will not be empty. It will come with what needs to be done. You create the fields. *This is what Mr. Keshe says, "One person on this planet can create the balance for the whole planet. It is just a matter of assembling the right direction with the right plasma and with the right energy to achieve it."*

Carolina: please talk about it even if people don't want to have anything to do with it. And when you have that feeling, you can always go through the

different doors; if they are in pain or suffering just give them something without explanation. Let them try it; the feedback will come back. Nobody likes to suffer. It can be done as a point of relieving the suffering no matter how small or how big, you will get there. But it is the real intent of your first steps and how you step out of your door and what you carry with the knowledge you have already gathered. You create the fields that you are open to receive before you even reach your friends, neighbors or people you meet, or even just strangers. (3.33.39...lost contact; she dropped off)

J: thank you Carolina, that was beautiful.

Caller: this is from Australia. I've been pushing and feel alienated. I've gone to the local school and they don't take me up on anything. They know I teach and they know my family background and my forefathers were war heroes. People are turning away because they are scared of the control of these elites or whatever. I've been talking to everybody when I go out with so much enthusiasm; even family have not taken me up on it. I got to a bit of a stage where I was dejected.

Rick: find like-minded people and have a local workshop with 2 or 3 people with KF who want to have a workshop. Maybe there are a dozen people who would like to get together. It doesn't have to be official. One occurred here to someone's home for people to come and experience the plasma technology from 11AM for 5PM and available to the public for free. It will open up for other workshops. They might have to have a small charge if they are making Magrav units for materials. The way I understand it is that there will be some big changes in the coming weeks regarding workshops and easier ways to get people to connect with each other. If you are looking for someone in a certain area and you want to connect with people then the information should be made available for searching for like minded people. Then you may find a different set of new friends.

Rick: You may find some new technologies that may appeal to your family that aren't accepting the technology right now. There are lots of cases such as Douglas' with his father. When he started using the gans materials the relationship changed. There's a chance where someone is hurting and you show them or give them something to ease their pain and that gets their attention. Then you can supply a gans pad or something simple as Caroline was talking about. Keep it simple and practical and supply gans pads and pain pads to family members and not get in trouble for copyrighting or manufacturing. It's a person to person thing and you work with knowledge

that you are getting from the KF because that is what it is all about. Then you won't have any problem with that sort of interaction. People become more open when they are skeptics and try something that works.

Carolina: Where did you lose me? (3.39.21 minutes) You know what I notice that people respond to? if you touch them in the field of their interest and not only in suffering, but say someone with a fish tank that have run into problems with their fish dying, I give them the zip bags with the CO₂ water and the fish within 15 minutes change. People don't understand but they see the change and they want to know more. You go where people are loving their flowers and their gardens, and if you apply gans waters in the gardens you can see immense difference. If they have mold in the house, show them how to spray with the CuO gans water to get rid of it. You can use enteric (essential) oils in combination with the gans waters such as lavender and chamomile which ease people with breathing problems because of molds and fungus because of the wetness of the weather or the conditions where they are.

Carolina: You can bring so many different changes in so many different areas. If you know people who don't know how to manage their electricity bills, and if it is not affordable to make the Magrav system, go to the Alecz beads system. They do the same job much easier, simpler and not so costly. Ask for help from other knowledge seekers. You can work in so many different levels and not only to reduce pain. It is just where their feelings are for their fish, their animals, their home atmosphere and even replacing simple nano coated plates connected with the nano coated copper wire in front of the windows and put a few bottles of the 4 ganses in the corner of the room then you rebalance the house and have a stable temperature inside the house even if it only in the room where they live continuously. It saves them so much and they see the difference. Spray the windows inside and outside with CO₂ gans water. It is the way you offer the information that makes the difference. Then they embrace it because they can see the change visually. Don't stick only with the pain pads and the pain pens.

Carolina: There are so many levels that you can give a hand. I am so proud that so many people are opening their doors. As Rick says, so many people are opening their doors to teach and to give. I am faced with a lot of strange situations here in Ghana but in a way it is beautiful because it continuously confirms that you can bring that little bit of change and you see the smiles in their faces. If I simply give the CO₂ gans water in a drinking bottle to

people as they are coming and going, within a week I see a smile and happiness in their faces. They are laughing, smiling, they are happy and have more energy and they come for more bottles. And, I make sure there is some 'mother' gans in the bottom of the bottle and I make sure they never go below ½ of the bottle. They only take it from the top so they don't lose their mother gans. They are sharing their water with other members of the family. And they keep bringing other people and they are giving me the same feedback: *it has made a big difference and we have changed and we can work better and we are more alert.* But the most beautiful thing I see when they come back is the shine in their faces.

Carolina: I wish and maybe I should take pictures of the faces before they use the water and a few days after they drink the water. There is a radiation like they are beaming. They don't understand it and they haven't noticed it, but that is the first thing that comes in my face is their shining faces. It is beautiful. And, I can just ask you to go where you enjoy and you can achieve and your results will triple. And if there is a wish in the Universal Council (chat) rooms, connect to the wish and you will see it growing. And we will confirm when it is done. One of the biggest wishes that came through that we were all aware of was the one in Aleppo. They ceased fire and people can start living again and building up their lives again.

Carolina: In North Dakota that wish is still standing there and they are still standing their ground. They are achieving so much that people are not aware of. The tribes are uniting after 150 years and they are becoming one again. They have been shattered to pieces and now they are all reuniting. You see one ceremony after another where they are joining back to their original One Tribe. That is the beauty of it. It doesn't matter how harsh it looks, but the healing process is taking place. And they are doing it. And this was one of their prophecies that this will be achieved. And, this is a lot of knowledge which a lot of people don't know. That was the first thing that was standing out was that the tribes were making peace with each other after so many years. That is more beautiful than all the rest. And because of their uniting they make one big huge loving plasma field and they are achieving it.

Carolina: I will ask all of you to keep on posting on the new link and the old one because they are two different compartments. Bring your experiences forward and share them. Share them with pleasure. I love you all and you are all are being so great. I know a lot of you have done a lot of sacrifices in

time, effort, tolerance and patience; all of you have really contributed to something very beautiful. And you are getting there. And I thank all of you.

Rick: we give thanks back to you for your position in all of this and it's sometimes in the background and we don't hear all of what is going on. But I am sure that being with Mr. Keshe all the time is more than a handful and it is probably the same way with Mr. Keshe with you. But the two of you take care of each other and make it so that all this great work can take place in spite of all the turmoil that goes on in the world and this is what we are working for and we have you as one of the main guiding hands in all of this; thank you very much.

Carolina: you are welcome Rick. The only thing that I ask is that every single one that is still present in this morning session I know there is a lot of terribleness coming. Please be aware, get prepared and in so many ways I have tried to put my hand out to a lot of people to stock up food for a long term. Get enough medicine that you need if you order it. Get everything in the house or near you and know of a safe place to go if it gets really bad. Make sure you have enough material if you need to stay outside of your house in this cold weather. Purchase and get your tents and camping gear out so that you can at least stay comfortable. Because we know it is going to 'go' in certain places, so please prepare yourselves and look after your neighbors and look after the friends and inform them. Not everyone is here and not everyone is following the Keshe Foundation but maybe you can help them by explaining that they have already sensed and felt the first signs that something is coming. So don't leave them in the dark; start debriefing them the same way you do with the technology. Start debriefing them to get ready. The people who have already felt the tremors especially in Italy and Greece and Fukushima know that this is not nice; it's a horrible feeling. Inform the people around you about the same process and to take care and to be prepared and know where they can go. Make a lot of gans water in reserve so that when something goes wrong at least you can help others around you. Gans water doesn't go bad. As long as you have stockpiled water, it is the first thing that will be affected. I have been trying not to go (on about this) because people say I am 'war mongering' or creating panic or going for the worst scenario. No, if you are prepared and it doesn't go bad, it's just good advice. Make sure you have candles and fuel in the house and that you have the stove where you can cook some food and a wood stove...try to find a way you can help yourself if you have to go off the grid, especially people with children. Make sure you have everything available

for them, and thank you. Move away from the _____ (3.53.30 minutes) and stay safe please.

Rick: thank you Carolina. I think we should probably close for today's session as we are almost a 4 hours unless someone wants to show or talk about something. Oh yes, I am going to end with the videos on the Second Universal Council.

End of 154th Knowledge Seeker's Workshop following the video presentation.
